Anti-Money Laundering in a Nutshellis a concise, accessible, and practical guide to compliance with anti-money laundering law for financial professionals, corporate investigators, business managers, and all personnel of financial institutions who are required, under penalty of hefty fines, to get anti-money laundering training. Money laundering is endemic. As much as 5 percent of global GDP (\$3.6 trillion) is laundered by criminals each year. It's no wonder that every financial institution in the United States—including banks, credit card companies, insurers, securities brokerages, private funds, and money service businesses—must comply with complex examination, training, and reporting requirements mandated by a welter of federal anti-money laundering (AML) laws. Ignorance of crime is no excuse before the law. Financial institutions and businesses that unknowingly serve as conduits for money laundering are no less liable to prosecution and fines than those that condone or abet it. In Anti-Money Laundering in a Nutshell: Awareness and Compliance for Financial Personnel and Business Managers, Kevin Sullivan draws on a distinguished career as an AML agent and consultant to teach personnel in financial institutions what money laundering is, who does it, how they do it, how to prevent it, and how to report it in compliance with federal law. He traces the dynamic interplay among employees, regulatory examiners, compliance officers, fraud and forensic accountants and technologists, criminal investigators, and prosecutors in following up on reports, catching launderers, and protecting the integrity and reputations of financial institutions and businesses. In particular, corporate investigators will gain rich insights winnowed from the author's experiences as a New York State and federal investigator.

How, if it all, do museums shape the ways in which society understands difference? In recent decades there has been growing international interest amongst practitioners, academics and policy makers in the role that museums might play in confronting prejudice and promoting human rights and cross-cultural understanding. Museums in many parts of the world are increasingly concerned to construct exhibitions which represent, in more equitable ways, the culturally pluralist societies within which they operate, accommodating and engaging with differences on the basis of gender, race, ethnicity, class, religion, disability, sexuality and so on. Despite the ubiquity of these trends, there is nevertheless limited understanding of the social effects, and attendant political consequences, of these purposive representational strategies. Richard Sandell combines interdisciplinary theoretical perspectives with in-depth empirical investigation to address a number of timely questions. How do audiences engage with and respond to exhibitions designed to contest, subvert and reconfigure prejudiced conceptions of social groups? To what extent can museums be understood to shape, not simply reflect, normative understandings of difference, acceptability and tolerance? What are the challenges for museums which attempt to engage audiences in debating morally charged and contested contemporary social issues and how might these be addressed? Sandell argues that museums frame, inform and enable the conversations which audiences and society more broadly have about difference and highlights the moral and political challenges, opportunities and responsibilities which accompany these constitutive qualities.
