values to the right and left. To the right of the decimal point, one place to the decimal value is the tenths, then the following value is the hundredths, then thousandths and then finally ten thousandths, so forth, as this can be seen below. A trick to remember them

Online Library Answers To Basic College Mathematics

4th Edition
is that the value places to the left side consists of 'ths' added to every place value on the left side of the decimal place.

answer to this division problem.
Restating this as a multiplication
problem would give $0 \cdot x = 20$.
But any number times zero gives
zero! So no sensible answer to $20 \div 0$
exists. Another way of
explaining this goes to the very
meaning of division. $20 \div 4 = 5$, 4

Online Library Answers To Basic College Mathematics
