Virus u0026 Nosema Testing for Honey Bees, Dave Wick, BVS Inc.- a NY Bee Wellness Webinar [Deborah Smith] Phylogeny of Apis species and the honey bees of India The Biology of Honey Bee Nutrition and What it Means to the Beekeeper Asian Honey Bees Biology Conservation

Asian Honey Bees integrates the expanded knowledge of the biology of Asian honey bees with knowledge of the western honey bee, Apis mellifera, examining and expanding all of the leading theories that explain those essential attributes of species of honey bees that result in both their great similarities and their enormous differences. The authors also review the place of Asian honey bees in human culture and how we can and must conserve Asian species.

Asian Honey Bees: Biology, Conservation, and Human ...

Apis cerana, the eastern honey bee, Asiatic honey bee or Asian honey bee, is a species of honey bee native to southern, southeastern, and eastern Asia. This species is the sister species of *Apis koschevnikovi* and both are in the same subgenus as the western (European) honey bee, *Apis mellifera*. *A. cerana* is known to live sympatrically along with *Apis koschevnikovi* within the same geographic ...

Apis cerana - Wikipedia

The Asian honey bee, *Apis cerana* Fabricius (Fig. 1), occurs in southern Asia. There are eight recognized subspecies of *Apis cerana*, including *Apis cerana cerana* and *Apis cerana indica*. Both *Apis cerana cerana* and *Apis cerana indica* are managed for honey production and crop pollination, similarly to how western honey bees, *Apis mellifera* L., are used in the United States.

15 years, teams in China, Japan, Malaysia, and Thailand began to shift focus to the indigenous Asian honey bees. Benjamin Oldroyd, well known for his work on the genetics and evolution of worker sterility, has teamed with Siriwat Wongsiri, a pioneer of the study of bees in Thailand, to provide a comparative work synthesizing the rapidly expanding Asian honey bee literature.

Asian Honey Bees □ Benjamin P. Oldroyd, Siriwat Wongsiri ...

Book review. This is an important text summarising in one volume current scientific knowledge about the Asian species of *Apis*. *Apis mellifera* the honey bee species indigenous to Africa the Middle East and Europe has been studied intensively to the extent that even its genome sequence is known. However the genus *Apis* evolving over 35 million years consists of more than just *mellifera*: at least ...
