I really, really enjoyed Automated Alice as a fun literary experiment (this is the first book I read by Jeff Noon). Though some (actually, most) of the present-time references are extremely cheesy, I suspect Noon did this totally on purpose. It's not as much a sci-fi twist on an [im]possible treacle trequel of the Alice

Automated Alice (Vurt, #3) by Jeff Noon - Goodreads

Jeff Noon has always been influenced by the work of Lewis Carroll, especially the two Alice books. In Automated Alice he brings Carroll's vision thoroughly up to date. Not so much a sequel to Alice in Wonderland and Through The Looking Glass, more of a trequel, the third book in a series of misadventures even wierder than your dreams.

Jeff Noon : Automated Alice : Fairytales From The Future. Bethan Roberts talks to Jeff Noon about his new novel Automated Alice. What's really nice about Jeff Noon is that, firstly, I can use a word like "nice" about him (not, I expect, a word most cyberpunks would be comfortable with), and secondly, beyond the street-level-city-techno-punkiness that precedes him in the form of his novels Vurt and Pollen lurks a sense of humour.

Jeff Noon : Automated Alice : Fairytales From The Future

Noon has now decided to link up with an imaginative precursor by introducing Lewis Carroll's Alice as the protagonist in a new adventure that draws on Carroll's through-the-looking-glass inversions of reality, and adds a Jeff Noon menace and edginess absent from Carroll's Wonderland. Alice finds herself in 1998 Manchester when she enters an old grandfather clock, and soon becomes the prime suspect in the puzzling "Jigsaw Murders."

What Alice encounters in the automated future is mostly accidental too...a series of misadventures even weirder than your dreams. Acknowledged as one of the most exciting new authors writing today, Jeff Noon's other works of fiction include "Vurt" (winner of the 1994 Arthur C. Clarke award), "Pollen, Nymphomation, Needle in the Groove, Cobralingus," and "Pixel Juice."

Noon describes Automated Alice as a "trequel" - it is a companion piece of sorts to the famous Lewis Carroll books, Alice's Adventures in Wonderland and Through the Looking-Glass. The novella follows Alice's journey to a future Manchester populated by Newmonians, Civil Serpents and a vanishing cat named Quark.

While Automated Alice promises much in it's early chapters, Noon is unable to deliver more than the occasional clever wordplay. The plot is unfulfilling, almost contrived at points. He tries hard to create the same bizarre feel that Carroll's books have, but is unsuccessful; instead Automated Alice feels frantic and unintelligible.
