□ Answer Key
Reproductive System 1.
Distinguish between a gamete and a gonad using specific examples from the male and female systems. Gonads are the organs of the reproductive system that produce the gametes (haploid sex cells)

Fertilization: Process in which two gamete cells unite. **Zygote:** A fertilized cell (the result of fertilization).

Meiosis: Cell division where the number of chromosomes is cut in half (results in haploids).

Gametogenesis: Process where haploid cells become gametes.
