also called Dictyosome.

## Golgi Body : Structure and Functions | Biology EduCare

The human body is the structure of a human being. It is composed of many different types of cells that together create tissues and subsequently organ systems. They ensure homeostasis and the viability of the human body. It comprises a head, neck, trunk (which includes the thorax and abdomen), arms and hands, legs and feet.

## Human body - Wikipedia

Synopsis Simple and straightforward, this introductory text provides a clear approach to learning the difficult concepts of anatomy and physiology. It focuses on two unifying themes the normal structure and function of the human body, and what the body does to maintain homeostasis.
