C-reactive protein (CRP) is a substance produced by the liver in response to inflammation. Other names for CRP are high-sensitivity C-reactive protein (hs-CRP) and ultra-sensitive C-reactive...

C-Reactive Protein Test: Purpose, Procedure, and Results

Your doctor might check your C-reactive protein level for infections or for other medical conditions. A high-sensitivity C-reactive protein (hs-CRP) test, which is more sensitive than a standard test, also can be used to evaluate your risk of developing coronary artery disease, a condition in which the arteries of your heart are narrowed.

C-reactive protein test - Mayo Clinic

C-reactive protein (CRP) is a protein that's produced by your liver and can be found in your blood. CRP levels in your blood rise in response to inflammation. The levels of CRP in your blood will...

Rheumatoid Arthritis: What CRP Levels Say About You

C-reactive protein (CRP) is a marker of inflammation in the body. Therefore, its level in the blood increases if there is any inflammation in the body. C-reactive protein, along with other markers of inflammation (erythrocyte sedimentation rate , " sed rate ," or ESR) are also sometimes referred to as acute phase reactants.

C-Reactive Protein (CRP) Test: Normal & High Ranges

C-reactive protein is a marker of inflammation and is typically not detected in the blood unless some degree of inflammation is present in the body. CRP measurement is made using a blood sample from a vein. The sample is then taken to a laboratory and analyzed. The traditional CRP measurement is often used to detect inflammation in the body.

C-Reactive Protein (CRP) Test: Normal and High Ranges ...

C-reactive protein (CRP) is an annular (ring-shaped), pentameric protein found in blood plasma, whose circulating concentrations rise in response to inflammation. It is an acute-phase protein of hepatic origin that increases following interleukin-6 secretion by macrophages and T cells.

C-reactive protein - Wikipedia
