Case Studies in Veterinary Immunology presents basic immunological concepts in the context of actual cases seen in clinics. It is intended for veterinary medicine students, interns, residents, and veterinarians, and serves as a valuable supplement and companion to a variety of core immunology textbooks and courses.

~~Case Studies in Veterinary Immunology | VetBooks~~

Regarding the patient in this case, the treatment he is receiving should be changed to the re-treatment regimen. Re-treatment regimen The re-treatment regimen consists of using all 5 first-line TB drugs (rifampicin, isoniazid, ethambutol, pyrazinamide and streptomycin) in the initial phase and 3 drugs (rifampicin, isoniazid and ethambutol) in the continuation phase.

This book presents case histories to illustrate in a clinical context essential points about the mechanisms of immunity. It includes cases that illustrate both recently discovered genetic immunodeficiencies and some more familiar and common diseases with interesting immunology.

The book includes a total of 53 cases. The Sixth Edition is extensively revised and updated and includes ten new cases: {u2022}DiGeorge Syndrome {u2022}Hemophagocytic Lymphohistiocytosis {u2022}Chediak-Higashi Syndrome {u2022}Hyper IgE Syndrome {u2022}Ataxia Telangiectasia {u2022}Warts, Hypogammaglobulinemia, Infections, and Myelokathexis (WHIM) Syndrome {u2022}Severe Congenital Neutropenia {u2022}Recurrent Herpes Simplex Encephalitis {u2022}Systemic Onset Juvenile Idiopathic Arthritis {u2022}Crohn{u2019}s Disease.

Case Studies in Immunology, Seventh Edition is intended for medical students and undergraduate and graduate students in immunology. It presents major topics of immunology through a selection of clinical cases that reinforce and extend the basic science. Each case history is preceded by essential scientific facts about the immunological mechanisms o

This case study is about a medical student with an inherited inability to make antibodies. His family history revealed that he had inherited this defect in antibody synthesis as an X-linked recessive abnormality. Pyogenic bacteria are the major cause of infection in X-linked agammaglobulinemia.

This book presents case histories to illustrate in a clinical context essential points about the mechanisms of immunity. It includes cases that illustrate both recently discovered genetic immunodeficiencies and some more familiar and common diseases with interesting immunology.

Case Studies in Veterinary Immunology presents basic immunological concepts in the context of actual cases seen in clinics. It is intended for veterinary medicine students, interns, residents, and veterinarians, and serves as a valuable supplement and companion to a variety of core immunology textbooks and courses. The book includes cases describing primary immune system defects, secondary immune system defects, and hypersensitivity and autoimmune disorders, as well as dysproteinemias and lymphoid neoplasia. Drawing on the successful approach of Geha's Case Studies in Immunology, each representative case is preceded by a discussion of the principles underlying that specific immunological mechanism. The case itself includes the presenting complaint (signalment), physical examination findings, pertinent diagnostic laboratory data, diagnosis, and treatment options. In those instances in which a specific disorder occurs in both animals and humans, the differences and similarities in the immunological mechanisms and manifestations of the disease are explored. End of case questions highlight important concepts and serve as a review aid for students. Details on standard vaccines and vaccination schedules, as

well as descriptions of the types of assays used for evaluation of the immune system, are included as appendices.

This book presents a case history of a patient with acute infectious mononucleosis, to illustrate in a clinical context essential points about the mechanisms of immunity; and to explain some of the immunological problems seen in the clinic. It is helpful for medical and pre-medical students.

26 real-life cases illustrate the applications of basic immunology in clinical settings May be utilized alone or as a companion to Immunology: A Short Course, 7th Edition by Richard Coico and Geoffry Sunshine (ISBN 9781118396919) Each case study is introduced by clearly written descriptions of the major immunological disorders Full colour photographs and illustrations complement complete presentation of real data Includes complete set of problems and discussion questions for each chapter

This is a case study of a 12-year-old boy who received massive intravenous penicillin and ampicillin injections to treat pneumonia and developed a serum sickness reaction to the antibiotics. Serum sickness can prove fatal if it provokes kidney shutdown or bleeding in a critical area.

Case Studies in Allergic Disorders is designed for undergraduate and graduate students in immunology, medical students, and resident physicians. It describes the basic cellular and molecular mechanisms involved in the pathogenesis of commonly occurring allergic diseases and introduces the rationale for targeted treatment of allergy. Replicating the successful approach of Case Studies in Immunology, the book presents mechanisms of hypersensitivity through a selection of clinical cases that reinforce and extend the basic science. The cases are largely drawn from the records of Children s Hospital Boston. Linking the discussion of pathogenesis to actual clinical presentation establishes important connections between the bench and bedside. The book can be used as either a stand-alone text or asa companion to Janeway s Immunobiology and The Immune System."
