The ability to read, interpret, and communicate information in the science classroom is a 21st century NGSS skill embedded in the STEMscopes curriculum. We believe that teachers have the power to guide students in rich scientific discourse through modeling, questioning, and feedback, while probing for deeper responses that help students explore their ideas more thoroughly.

Summary. The primary cause of tides is the gravitational attraction of the Moon, which causes two high and two low tides a day. When the Sun's and Moon's tides match, there are spring tides; when they are opposed, there are neap tides. The difference between the daily high and the daily low is the tidal range.
