A teacher is a person who not only teaches but also guides his/her student in building a successful career. The future of a nation lies upon the level of knowledge the people in the country are having. Thus, the responsibility of a teacher goes far beyond what we think of it at an

individual level. We have seen people are interested in making their career in many other professions but teaching as a profession is not the first choice in most cases. Nevertheless, teaching is one of the most interesting professions as it involves a continuous learning exercise and at the same time making others learned by delivering the knowledge one is having. The teachers assess their students but at first, they also get assessed under UGC NET conducted by the National Testing Agency. The National Eligibility Test (NET), also known as UGC NET or NTA-UGC-NET, is the test for determining the eligibility for the post of Assistant Professor and/or Junior Research Fellowship (JRF) award in Indian universities and colleges. UGC NET is considered as one of the toughest exams in India, with success ratio of merely 6%. Previously, the passing ratio was around 3% - 4%. Assistant Professors in private colleges may or may not be NET qualified but NET qualification is mandatory for universities & government colleges.

An indispensable guide for professionals using the popular Behavior Assessment System for Children (BASC), this book provides in-depth coverage of all BASC components, their uses, clinical and research applications, and interpretation. Written by BASC originators Cecil R. Reynolds and Randy W. Kamphaus, the book demonstrates the use of the system in clinical work with children with ADHD, behavior problems, depression, and many other conditions. Important research studies are presented and applications discussed for program evaluation, screening and early intervention research, diagnosis, treatment design, and treatment monitoring. The book contains numerous illustrative case studies. Other invaluable features are tables guiding the interpretation of deviant scores for each scale; several new subscales, including a Frontal Lobe/Executive Function scale; detailed coverage of forensic applications; and useful appendices, including a Spanish-language informational handout for parents.
