We live in a time of unprecedented planetary ecocrisis, one that poses the serious and ongoing threat of mass extinction. Drawing upon a range of theoretical influences, this book offers the foundations of a philosophy of ecopedagogy for the global north. In so doing, it poses challenges to today's dominant ecoliteracy paradigms and programs, such as education for sustainable development, while theorizing the needed reconstruction of critical pedagogy itself in light of our presently disastrous ecological conditions.

Does university seem like another planet? Does everyone else seem to speak another language? What can you do to make the grade? If these are the kind of questions you are asking, then this is the book you need. After the excitement of being accepted, the reality of life at university or college can be daunting, but help is at hand. This practical book guides new students through the terminology used at university and shows you: what a student needs to know how to be accepted by students and lecturers how to get the best out of your institution and yourself how to communicate using appropriate language in higher education institutions how to learn the conventions of your specific subject area how to be confident and competent in your new world All new students find the move to university slightly bewildering, but with this book you can be one step ahead. The author has spent time talking to students across a broad range of different universities and uses her first-hand experience as a basis for the book. Understanding University provides a lifeline for new students in further and higher education offering everything from practical advice on studying, to explanations of frequently used terms. If you don't know the difference between a seminar and a tutorial or want to know what 'matriculation' means, then this is where to start. Need a little assistance? Just open this book. And remember - you are not alone.

To stop the downward spiral of intensifying environmental violence that inevitably leads to social violence we, as humans, need to better understand what is at stake and to determine how to make changes at the root levels. Ecopedagogy is centered on understanding the struggles of and connections between human acts of environmental and social violence. Greg W. Misiaszek argues that ecopedagogies grounded in critical, Freirean pedagogies construct learning that leads to human actions geared towards increased social environmental justice and planetary sustainability. Teaching to understand the social aspects of environmental issues, from local to global to planetary perspectives, as well as through critical theoretical lenses, transdisciplinary scholarship, and diverse epistemologies (i.e., ways of knowing), is essential to determine actions for lasting changes toward environmental wellbeing. Reinventing Paulo Freire's terminology, teaching to read the World as part of Earth (i.e., ecopedagogical literacy) for praxis. Throughout the book he will discuss the need for teaching, reading, and researching through problematizing the causes of socio-environmental violence, including oppressive processes of globalization and constructs of "development", "economics", and "citizenship", to name a few, that emerge from socio-historical oppressions (e.g., colonialization, racism, patriarchy, neoliberalism, xenophobia, epistemicide) and dominance over the rest of nature. Misiaszek concludes with ecopedagogies' challenges within the current post-truth era and possibilities of reimagining UNESCO's Sustainable Development Goals (SDGs).

"Good books make important points because their authors have something worthwhile to say. This book is more than a good book because its authors not only make important points but they do so in ways that exemplify the transdisciplinarity the authors write about. In eight interesting and insightful chapters the book connects pedagogy, marketing, development, immanence, race, resilience, technology, and the commons in ways that show the necessity and importance of transdisciplinary thinking. This is a book for those who seek deeper and more

creative connections to a sustainable way of life, a way of life that opens up imaginative acts of hope.” – John Novak, Professor in the Department of Graduate and Undergraduate Studies in Education at Brock University; his research interests include: Philosophy of education, Invitational theory and practice, Educational leadership, and Social-cultural contexts of education

"The scope and nature of this account of the modern history of reading/literacy education (especially tied to the aspirational readers) are unique. Enlisting the metaphor of waves, it traces monumental shifts in theory, research and practice related to reading education and literacy that represent developments that verge on revolutionary changes. Each of these waves is accompanied with a discussion of the aspirational reader that sets the stage for contemplating these shifts and their significance. The discussions trace the research and theoretical developments in a fashion that exemplifies the origins of the shifts and their influences"--

The Daily Planet is a long-awaited selection of Patricia Aufderheide's most important critical essays, updated and organized thematically to demonstrate the breadth of her thinking on media and film, public telecommunications policy, and contemporary society. The result is a pithy and provocative exploration of "the culture of daily life under capitalism". Here, Aufderheide demonstrates criticism that is both activist and analytical. She probes the processes that shape our culture by examining diverse subjects, including the struggle to create quality children's television programming, the meaning of Paul Harvey, the evolution of the war film over the past thirty years, and the ways journalism is changed by the Internet and other new technologies. Throughout, Aufderheide foregrounds democratic values, displaying the penetrating insights that have made her a leading public intellectual and commentator on contemporary culture.

To stop the downward spiral of intensifying environmental violence that inevitably leads to social violence we, as humans, need to better understand what is at stake and to determine how to make changes at the root levels. Ecopedagogy is centered on understanding the struggles of and connections between human acts of environmental and social violence. Greg W. Misiaszek argues that ecopedagogies grounded in critical, Freirean pedagogies construct learning that leads to human actions geared towards increased social and environmental justice and planetary sustainability. Throughout the book he discusses the need for teaching, reading, and researching through problematizing the causes of socio-environmental violence, including oppressive processes of globalization and constructs of "development", "economics", and "citizenship", to name a few, that emerge from socio-historical oppressions (e.g., colonialization, racism, patriarchy, neoliberalism, xenophobia, epistemicide) and dominance over the rest of nature. Misiaszek concludes with ecopedagogies' challenges within the current post-truth era and possibilities of reimagining UNESCO's Sustainable Development Goals (SDGs).

People currently live in a digital age in which technology is now a ubiquitous part of society. It has become imperative to develop and maintain a comprehensive understanding of emerging innovations and technologies. Information and Technology Literacy: Concepts, Methodologies, Tools, and Applications is an authoritative reference source for the latest scholarly research on techniques, trends, and opportunities within the areas of digital literacy. Highlighting a wide range of topics and concepts such as social media, professional development, and educational applications, this multi-volume book is ideally designed for academics, technology developers, researchers, students, practitioners, and professionals interested in the importance of understanding technological innovations.

With the current ubiquity of technological tools and digital media, having the skillset necessary to use and understand digital media is essential. Integrating media literacy into modern day education can cultivate a stronger relationship between technology, educators, as well as students. The Handbook of Research on Media Literacy in the Digital Age presents key research in the field of digital media literacy with a specific emphasis on the need for pre-service and in-service educators to become familiar and comfortable with the current digital tools and applications that are an essential part of youth culture. Presenting pedagogical strategies as well as practical research and applications of digital media in various aspects of culture, society, and education, this publication is an ideal reference source for researchers, educators, graduate-level students, and media specialists.

The Critical Media Literacy Guide: Engaging Media and Transforming Education provides a theoretical framework and practical applications in which educators put these ideas into action in classrooms with students from kindergarten up through the university.
