Cut and cover The new Arden, Parkville and Anzac stations and the entrances to the tunnels will be built using the cut and cover construction technique. Cut and cover construction involves using excavation equipment to dig a large trench or rectangular hole in the ground which is

# Get Free Cut And Cover

then covered by a  
concrete deck.

covered by a concrete deck. Once the deck is in place, surface activity can largely resume as construction works continue below.

During construction of the stations, poured concrete or pre-cast panels are used to form the various levels and internal structures, similar to
