"The unexamined life is not worth living" -Socrates Many of the world

Hoping to surprise and impress the horse-loving Empress Elisabeth of Austria during her imminent visit to his ancestral home, the Duke of Buclington decides that he must invest in some of the best thoroughbred Hungarian horses. He had planned to take his lovely young daughter, Lady Aletha, to Hungary with him to buy them, but, when Queen Victoria sends him on an important errand to

Denmark, he is then forced to send in her place his equestrian stalwart, Mr. James Heywood. Bitterly disappointed by this as she loves her father, Aletha slips away, secretly intending to catch up with Mr. Heywood on the Calais to Vienna train when it is too late for him to order her back to England. Beautiful as she is, she quickly attracts the unwanted attentions of a lecherous German traveller, but luckily a flabbergasted Mr. Heywood comes to her rescue just in time. After much cajoling, he is persuaded not to return her to her father but to take her with him, pretending that she is his granddaughter. Their mission is a great success. They find all the superlative horses that they were

seeking, but Aletha loses her heart to a handsome and charming Hungarian Prince. And it seems that her deceit will become her undoing when he tells her that he can never marry her because she is not of noble blood.

Every day, we evaluate the people around us: It's one of the most important things we ever do. Making Sense of People provides the scientific frameworks and tools we need to improve our intuition, and assess people more consciously, systematically, and effectively. Leading neuroscientist Samuel H. Barondes explains the research behind each standard personality category: extraversion,

agreeableness, conscientiousness, neuroticism, and openness. He shows readers how to use these traits and assessments to do a better job of deciding who they'll enjoy spending time with, whom to trust, and whom to keep at a distance. Barondes explains: What neuroscience and psychological research can tell us about how personality types develop and cohere. The intertwined roles of genes, nurture, and education in personality development. How to recognize troublesome personality patterns such as narcissism, sociopathy, and paranoia. How much a child's behavior predicts their adult personality, and how personality

Page 14/21

stabilizes in young adulthood. How to assess integrity, fairness, wisdom, and other traits related to morality. What genetic testing may (or may not) teach us about personality in the future. General strategies for getting along with people, with specific tactics for special circumstances. Kirkus Reviews A succinct look at personality psychology. As a psychiatrist and neuroscientist at the University of California, Barondes (Molecules and Mental Illness, 2007, etc.) has spent years studying human behavior, and this book reflects his systematic, scientific approach for personality assessment. The average person isn't likely to have time to research a difficult boss or potential love interest,

but the author supplements intuition with a useful cornerstone for gauging human behavior: a table of the "Big Five" personality traits, among them Extraversion vs. Introversion and Agreeableness vs. Antagonism. To learn how to apply the Big Five, Barondes supplies a link for a professional online personality test, in addition to a basic introduction of troubling personality patterns–e.g., narcissism and compulsiveness. While genetics may play a heavy hand in influencing personality, Barondes writes, it's awareness of a person's background, character and life story that is paramount in unearthing reasons for adult behavior. Readers might like to see the author weave more

everyday examples into the text–his exercise in fostering compassion by imagining an adult as a 10-year-old child is a gem–but there is plenty here to ponder. Those looking for traditional "self-help" advice won't find it here, but this book clearly lays the groundwork for deeper human interaction and better life relationships.
