This book discusses how aquatic microbial communities develop interactive metabolic coordination both within and between species to optimize their energetics. It explains that microbial community structuration often includes functional stratification among a multitude of organisms that variously exist either suspended in the water, lodged in sediments, or bound to one another as biofilms on solid surfaces. The authors describe techniques that can be used for preparing and distributing microbiologically safe drinking water, which presents the challenge of successfully removing the pathogenic members of the aquatic microbial community and then safely delivering that water to consumers. Drinking water distribution systems have their own microbial ecology, which we must both understand and control in order to maintain the safety of the water supply. Since studying aquatic microorganisms often entails identifying them, the book also discusses techniques for successfully isolating and cultivating bacteria. As such, it appeals to microbiologists, microbial ecologists and water quality scientists.

challenges for everyone to try.

Wulff's life history is of considerable interest in itself. In her biographical essay (Part I) Selena Axelrod Winsnes portrays him as a 'marginal man': being a Jew in Denmark at the beginning of the 19th century was to some extent an uphill struggle for those who sought public recognition, and Wulff did not escape discrimination in his administrative career at Christiansborg either, although special circumstances allowed him to hold important positions, and yet, only for the short term. Paradoxically, on his arrival to the Gold Coast Wulff - as a Jew - was placed in a middle position in the racial hierarchy dominating the mind-set of his superiors in Copenhagen - between Africans and Europeans. In many respects he shared the fate of Euro-Africans, straddling two worlds and being 'sealed off' from the top echelons of the European establishments on the Coast. This book comprises two parts. The first is a biographical presentation of Wulff Joseph Wulff , a Danish Jew. It is an essay concerning the last six years of his life, spent on the Gold Coast of West Africa, based on letters he wrote to his family in Denmark. Those letters were published in 1917 as *Da Guinea var Dansk* [When Guinea was Danish], by Carl Behrens, a member of his family in Denmark. The second part of the book is an edited translation of the letters from Danish into English.

the value of loyalty, believing in themselves, and doing the right thing. They discover there is nothing in the life of a boy quite like having a dog, and that sometimes all that is necessary for good to prevail, is for innocence to triumph over evil and to have a dog named Tracker.
