The Dentistry interview book is the number one selling dentistry book worldwide, providing an up-to-date review of the most common questions, with full answers and pointers on what the interviewers are looking for. Described as the 'essential guide', it is a vital resource as part of your preparation. Example question:Consider the case of nine year old Rebecca who comes in to surgery with her parents. This is her first dental visit. She has been kept awake with a painful tooth. Examination shows that she has several decayed teeth and that a lower right primary molar is causing the present pain. Rebecca is crying and climbing out of the dental chair. What is the best way to handle this situation.Clinically Rebecca's case draws on various themes. Without starting your undergraduate training you will not need to know about the clinical implications in detail. However, an understanding of the themes will make you stand out. A common answer is to indicate that some dentists may consider writing a brief referral letter to the local hospital for this tooth to be extracted with a

General anaesthetic. The questions that you want to be thinking about clinically are: □ Can this tooth be restored or does it need extraction? □ What are the implications if I extract in the future (orthodontically can it have consequences) □ Does the patient need General Anaesthetic or can this be managed within practice under Local Anaesthetic. □ Rebecca has other dental needs as stated and has never attended a dentists before, how would I like to manage this to cause her the least upset? All of the above would require consideration of who would be consenting for the patient. In this case at 9 years old, the patient would require a parent or legal guardian to consent for her. 'Gillick Competence' allows for a child up to the age of eighteen to make their own decision regarding their care. However, the dentist must carefully assess that all the criteria for valid consent detailed in question four are present. There is particular emphasis placed on the patient's ability to understand and retain all the information given and communicate their reasoned decision. 'Gillick Competence' will be more relevant for scenarios where the child in question is slightly older. The ethical and legal responsibility to respect children as well as those who support them is essential in establishing strong professional relationships. In this particular situation explaining the options and offering choices will help the parents to make their decisions appropriately after understanding what's on offer, which in turn will increase the likelihood of co-operation, whichever option is finally decided upon. For Example: "The dentist should tell the family about the options and explain how the pain can be controlled with analgesics and a simple dressing. He /she should explain that it may be wise to slowly introduce Rebecca to dental care so that she becomes familiar with the dental environment before starting treatment. In this way he is enforcing the act of beneficence by acting in the patient's best interests and enabling the child's parents to make an informed decision- thereby enabling autonomy" Topics covered: GENERAL POINTS TO CONSIDER TRADITIONAL INTERVIEWS AND MMIS SCIENCE QUESTIONS ETHICAL QUESTIONS ABOUT THE UNIVERSITY PERSONAL QUALITIES ABOUT YOU WORK EXPERIENCE AND EDUCATION DENTAL & INDUSTRY DENTISTRY IN THE NHS CURRENT AFFAIRS Want to be tutored by the authors for your dentistry interview? Is it possible to create an admissions screening process that allows any educational institution to select top-performing applicants and simultaneously promote diversity? Is it possible to choose applicants genuinely motivated in the pursuit of a profession rather than those primarily focused on acquiring wealth or status? Is it possible to achieve all of the above, being fair to all applicants and reducing the time and cost of the admissions screening process? Dr. Behrouz Moemeni, one of the most sought-after admissions expert and an outspoken advocate for fair and scientific admissions screening, believes the answer to all of the above questions is a resounding "YES". In this thought-provoking book, he explains how using first principles in psychology, immunology, sociology, evolutionary biology, statistics, physics, and chemistry can help universities select applicants passionate about their future professions. After convincing the readers about the flaws of current admissions screening practices - such as the use of situational judgment tests, standardized tests, and traditional interviews - he explains a step-by-step action plan described in 14 "rules" designed for any educational institution seeking to construct a fair and scientific admissions screening process. The book is filled with blunt reasoning debunking common myths and lighthearted humor about what to do instead suitable for admissions professionals, researchers and anyone interested in applicant screening in higher education. Here's what you are going to learn in this book: The fundamental problems with current admissions screening practices that lead to profound bias against minority groups and lower income applicants How to streamline the entire admissions process into one single step The Big Three(tm): The only 3 qualities that matter in admissions screening How to select applicants based on The Big Three characteristics How to design questions that seek the truth from each applicant How to separate highly suitable applicants from the rest without any guess work or "gut feeling" How to design questions that promote diversity while being fair to applicants How to increase the reliability and validity of any admissions screening practice or tool How to democratize the admissions process and educational institutions Sample questions and answers for admissions teams And much more!

An NPR Best Book of 2017 "[Teeth is] . . . more than an exploration of a two-tiered system—it is a call for sweeping, radical change." —New York Times Book Review "Show me your teeth," the great naturalist Georges Cuvier is credited with saying, "and I will tell you who you are." In this shattering new work, veteran health journalist Mary Otto looks inside America's mouth, revealing unsettling truths about our unequal society. Teeth takes readers on a disturbing journey into America's

Silent epidemic of oral disease, exposing the hidden connections between tooth decay and stunted job prospects, low educational achievement, social mobility, and the troubling state of our public health. Otto's subjects include the pioneering dentist who made Shirley Temple and Judy Garland's teeth sparkle on the silver screen and helped create the all-American image of "pearly whites"; Deamonte Driver, the young Maryland boy whose tragic death from an abscessed tooth sparked congressional hearings; and a marketing guru who offers advice to dentists on how to push new and expensive treatments and how to keep Medicaid patients at bay. In one of its most disturbing findings, *Teeth* reveals that toothaches are not an occasional inconvenience, but rather a chronic reality for millions of people, including disproportionate numbers of the elderly and people of color. Many people, Otto reveals, resort to prayer to counteract the uniquely devastating effects of dental pain. Otto also goes back in time to understand the roots of our predicament in the history of dentistry, showing how it became separated from mainstream medicine, despite a century of growing evidence that oral health and general bodily health are closely related. Muckraking and paradigm-shifting, *Teeth* exposes for the first time the extent and meaning of our oral health crisis. It joins the small shelf of books that change the way we view society and ourselves—and will spark an urgent conversation about why our teeth matter.
