Dinosaurs are a diverse group of reptiles of the clade Dinosauria. They first appeared during the Triassic period, between 243 and 233.23 million years ago, although the exact origin and timing of the evolution of dinosaurs is the subject of active research. They became the dominant terrestrial vertebrates after the Triassic – Jurassic extinction event 201.3 million years ago; their dominance ...

Dinosaurs - The New York Times  
 Eurypterus, a prehistoric animal of New York. Dmitris Siskopoulos. A little over 400 million years ago, during the Silurian period, much of North America, including New York State, was submerged under water. The official state fossil of New York, Eurypterus was a type of marine invertebrate known as a sea scorpion, and was one of the most feared undersea predators before the evolution of ...

 Paleontology in New York refers to paleontological research occurring within or conducted by people from the U.S. state of New York. New York has a very rich fossil record, especially from the Devonian. However, a gap in this record spans most of the Mesozoic and early Cenozoic.. Much of New York was covered in seawater during the early part of the Paleozoic era.
