Dupuytren's contracture - NHS
Dupuytren's disease, also called Dupuytren's contracture, is a benign thickening of the connective tissue, or fascia, of the palm and fingers. It usually starts with a tiny lump, called a nodule, in the palm that is often mistaken for a blister or callus. Eventually string like cords develop beneath the skin, and if the condition progresses the affected fingers are pulled towards the palm and cannot be straightened anymore, resulting in Dupuytren's contracture.

About Dupuytren's disease | The British Dupuytren's Society
According to the American Dupuytren's specialist Dr. Charles Eaton, there may be three types of Dupuytren's disease: Type 1: A very aggressive form of the disease found in only 3% of people with Dupuytren's, which can affect men under 50... Type 2: The more normal type of Dupuytren's disease, ...

Dupuytren's Contracture: Causes, Symptoms, and Treatment
Dupuytren's disease is a benign, progressive fibroproliferative condition of the hand. It causes the bands of connective tissue in the palm to thicken and form nodules and cords. The cords can slowly (over months or years) contract and pull the digits towards the palm resulting in a contracture. The cause of Dupuytren's disease is unknown.

Dupuytren's disease | Topics A to Z | CKS | NICE
What is Dupuytren Disease? Dupuytren's contracture is a benign condition which causes a tightening of the flesh beneath the skin of the palm and can result in permanently bent fingers. There is a sheet of tissue just under the skin of the palm which is stuck to the undersurface of the skin of the palm.

Dupuytren's Contracture: Causes, Symptoms, and Diagnosis

Dupuytren's disease is a condition that affects the fascia—the fibrous layer of tissue that lies underneath the skin in the palm and fingers. In patients with Dupuytren's, the fascia thickens, then tightens over time. This causes the fingers to be pulled inward, towards the palm, resulting in what is known as a "Dupuytren's contracture."

Dupuytren's Disease - Dupuytren's Contracture - OrthoInfo ...

Dupuytren's disease has been given the moniker " the Viking disease " due to its prevalence in the north of Europe and those of Northern European descent. According to tradition, the condition was common among the Vikings, who conquered and raided much of Northern Europe, spreading the disease among the populations they intermarried with.
