The blood type diets are fad diets advocated by several authors, the most prominent of whom is Peter J. D'Adamo. These diets are based on the notion that blood type, according to the ABO blood group system, is the most important factor in determining a healthy diet, and each author recommends a distinct diet for each blood type. The consensus among dietitians, physicians, and scientists is that these diets are unsupported by scientific evidence. In what was apparently the first study testing whe

*Blood type diet - Wikipedia*

Eat a variety of foods that are recommended to people with either blood types A or B. This can be thought of as a well-rounded diet, since it includes plenty of fiber, plant foods, and also some dairy and animal sources of protein. Eat a variety of vegetables, fruits, seafood, fish, meat, dairy, legumes and grains.
