Illustrated with nearly 100 photographs, *New Worlds, New Animals* gives readers a new respect for and understanding of the role of zoos in social and cultural history.

The Iconography of Peter Booth.

'He is what we would call a very good attendant, who would not run away or flinch from any patient, but would try to have his orders carried out if possible.' Such was the view of William Coady, attendant to the insane in the British settler colony of Victoria, Australia in the 1870s. *Attending Madness* is a history of William Coady's occupation, a history of asylum work and workers in nineteenth-century Australia. It considers not only who attendants were and why they worked in the asylum, but also how they and others variously defined 'the very good attendant'. Colonial asylum advocates imagined the attendant as an archetype, drawing on ideas from Britain about the nature of insanity and its treatment. In exploring the articulation of these ideas in a colonial context, and their effect on the asylum workplace, Lee-Ann Monk makes an important contribution to the international history of the asylum. She also opens new dimensions in the history of this occupation, on which the fate of patients very much depended, by analysing attendants' efforts to construct an occupational identity and give meaning to their work, thus providing new insights into their sense of themselves and their occupation.

Stories of the British airmen shot down over Western Europe who evaded capture by the Germans and made their way to Allied territory during World War II. During the five years from May 1940 to May 1945 several thousand Allied airmen, forced to abandon their aircraft behind enemy lines, evaded capture and reached freedom, by land, sea and air. The territory held by the Germans was immense—from Norway and Denmark in the north, through Holland, Belgium, Luxembourg to the south of France—and initially there was no organization to help the men on the run. The first one to assist the evaders and escapers ("E & E" as the Americans called them) was the PAT line, along the Mediterranean coast to Perpignan and down the Spanish border; named after a naval officer Pat O'Leary, from 1942 it became the PAO line. Next was the Comet line, from Brussels to the Pyrenees. Thousands of brave people were to be involved for whom, if caught, the penalty was death. Theirs is a stirring and awe-inspiring story. Respected historian Oliver Clutton-Brock has researched in depth this secret world of evasion, uncovering some treachery and many hitherto unpublished details, operations and photos. It is a tremendous reference work, written in his own colorful style with numerous anecdotes, which fills a gap of knowledge formerly unavailable to historians, professional or amateur. Packed the information, key figure biographies and listings—2, 094 evaders identified—this is a valuable testimony to the courage of all those involved.

Jack Ryan Jr.—along with the covert warriors of the Campus—continues to uphold his legendary father's legacy of courage and honor in this thriller from #1 New York Times bestselling author Tom Clancy. Privately training with special forces, he's honing his combat skills to continue his work within the Campus, hunting down and eliminating terrorists wherever he can—even as Jack Ryan Sr. campaigns to become President of the United States again. But what neither father nor son knows is that the political and personal have just become equally dangerous. A devout enemy of Jack Sr. launches a privately-funded vendetta to discredit him and connect him to a mysterious killing in his longtime ally John Clark's past. All they have to do is catch him. With Clark on the run, it's up to Jack Jr. to stop a growing threat emerging in the Middle East, where a corrupt Pakistani general has entered into a deadly pact with a fanatical terrorist to procure four nuclear warheads they can use to blackmail any world power into submission—or face annihilation.

Lotty is a clumsy single Forensic Scientist, and there are many reasons for that; more people have seen the Holy Grail than have seen Lotty's genitals. But that will soon be changing, as she sets out to solve the murder of a gossip columnist, all while trying to control her flatulence in the presence of a recently relocated Detective Sergeant. Not forgetting using a marital aid as a self-defence weapon...

The rapid progress on somatic embryogenesis and its prospects for potential application to improving woody plants prompted us to edit this book initially in three volumes, and now an additional three more volumes. We were all convinced that such a treatise was needed and would be extremely useful to researchers and students. This volume 6 is dedicated to Prof. Harry Waris, Helsinki, Finland, who did pioneer work on somatic embryogenesis during the time when Prof. Steward and others were actively engaged in this area. His former student Prof. Liisa Simols, University of Helsinki, Finland, has written a dedication 'Harry Waris, a pioneer in somatic embryogenesis' to her teacher Prof. Waris. This volume is divided into three sections and contains a total of 26 chapters. Section A comprises seven chapters covering topics such as: Historical insights into some contemporary problems in somatic embryogenesis (SE); Thin cell layer for somatic embryogenesis induction in woody trees; SE in tropical fruit and forest trees; SE in fruit and forest arid trees; Status of SE in Indian forest trees; SE research in fruit trees in India; Applications of SE for the improvement of tropical fruit trees. Section B comprises 15 chapters, dealing with: SE in oil palm, hazelnut (*Corylus avellana* L.), pistachio (*Pistacia vera* L.), *Araucaria angustifolia*, *Quercus suber*, *Aspidosperma polyneuron*, *Acacia senegal*, *Simmondsia chiensis*, *Cupressus sempervirens*, pecan (*Carya illinoensis*), rattan (*Calamus* spp.), tamarillo (*Cyphomandra betacea*, longan (*Dimocarpus longan* Lor.), *Aegle marmelos*, and *Euonymus europaeus*. Section C comprises three chapters related to cryo-storage of citrus, conifers and rubber. All the chapters have been peer-reviewed and revised accordingly to improve the quality of the chapters. We are thankful to all: (a) contributory authors for their co-operation in submitting manuscripts in time, and (b) reviewers for spending their valuable time in reviewing the manuscripts.

Anyone who has read one of Robert Manne's newspaper columns or one of his powerful Quarterly Essays will find here a treasure-house of thought, argument and evocation. The perfect book for anyone interested in the key political and cultural controversies of the past thirty years.

This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1984.
