Media and Entertainment Law presents a contemporary analysis of the law relating to the media and entertainment industry both in terms of its practical application and its theoretical framework. It provides a clear, current and comprehensive account of this exciting subject. Fully updated and revised, this second edition is one of the first texts to contain a full analysis of the Leveson Inquiry and the implications for our press and media that are arising from it. The new edition contains; a new chapter analysing the Defamation Act 2013; the Digital Economy Act 2010 which aimed to toughen up against copyright infringement online and has been subject to parliamentary review since coming into power; and the liability of internet service providers, including recent cases such as Tamiz vs Google 2012, which goes some way to define the extent to which an ISP may or may not be found liable for their bloggers content. With integrated coverage of Scots and Northern Irish law, Media and Entertainment Law also highlights comparisons with similar overseas jurisdictions, such as with the liability of ISPs where there are differences in both US and European law, in order to help students demonstrate an awareness of media laws, which may then influence UK legislation. Looking at key aspects such as TV and radio broadcasting, the print press, the music industry, online news and entertainment and social networking sites, this text provides detailed coverage of the key principles, cases and legislation as well as a critical analysis of regulatory bodies such as OFCOM and the new regulator for the UK's newspapers and magazines (and online editions), the Independent Press Standards Organisation (Ipso). The text also provides the most comprehensive and up to date coverage of the law relating to Intellectual Property law for the entertainment industry with recent changes in EU law relating to performers' rights. Media & Entertainment Law presents a contemporary analysis of the law relating to the media and entertainment industries both in terms of its practical application and its theoretical framework, providing a broad and comprehensive coverage of these fast changing branches of the law. Fully restructured to complement how media law is taught today in the digital age, this third edition explores recent updates in the law including the outcomes of the Google Spain case and the 'right to be forgotten', the use of drones in breach of privacy laws, internet libel and the boundaries of media freedom and press regulation following the Leveson inquiry. Media & Entertainment Law uses the most up-to-date authorities to explore privacy and confidentiality subjects, such as the Prince Charles 'black spider' letters, the Maximilian Schrems and the celebrity superinjunction PJS v Newsgroup Newspapers cases. The book also covers defamation, contempt of court and freedom of information, plus Scots law. New to this edition: A brand new chapter is dedicated to exploring technology and the media, including contemporary issues such as the dark web, the surveillance state, internet censorship and the law and social media, including bloggers, vloggers and tweeters. The chapters on regulatory authorities have been expanded to provide greater clarification and explanation of broadcasting, press and advertising regulation, including the protection of journalistic sources and comparisons with EU Law. The chapter on intellectual property and entertainment law has been streamlined to match media law courses more effectively. This text provides students with detailed coverage of the key principles, cases and legislation as well as a critical analysis of this vibrant subject.

Media and Entertainment Law presents a contemporary analysis of the law relating to the media and entertainment industry both in terms of its practical application and its theoretical framework. Looking at key aspects such as TV and radio broadcasting, the print press, the music industry, online news and entertainment and social networking sites, this textbook provides students with detailed coverage of the key principles, cases and legislation as well as a critical analysis of regulatory bodies such as the Press Complaints Commission and OFCOM. Media and Entertainment Law is also the first book to discuss superinjunctions and the phone-hacking scandal involving News of the World.

This book considers a new approach to online copyright infringement. Rather than looking at the subject within a purely technological context, it provides legal analysis from a human perspective. This book highlights that there are three key instances in which the capacity of a human mind intersects with the development of copyright regulation: (1) the development of copyright statutory law; (2) the interpretation of the copyright statutory law the judiciary; and (3) human interaction with new technology. Using a novel framework for constructing digital perspectives, the author, Dr Hayleigh Bosher, analyses the laws relating to online copyright infringement. She provides insights into why the law appears as it does, shedding light on the circumstances of how it came to pass and demonstrates a clear malfunction in the interpretation and application of copyright law to online activities that derives from the disconnect between the technological and the human perspectives. The book proposes putting the human element back into copyright analysis to enable the return of reason where it has been lost, and provide a clearer, more consistent and fair legal regulation of online copyright infringement. Law, Technology and Cognition: The Human Element in Online Copyright Infringement will be of interest to students, academics, researchers, as well as practitioners.

This book explores whether global music copyright law and the performers' rights regime (PRR) have been able to improve the economic position of artists, as they were originally intended to. The author investigates whether this regime effectively addresses contemporary issues regarding royalty payments and cover songs in Sri Lankan music, drawing on the empirical findings of a case study she conducted on the Sinhala music industry. She finds that the PRR developed internationally and implemented in Sri Lanka is predicated on a particular view of the role of performers and their relationships with other actors in the music industry; although this view can be found in the USA, UK and India, it does not seem to reflect the established practices and relationships within Sri Lanka's contemporary music industry. While providing a socio-historical and legal analysis of these differing industrial settings and investigating the manner in which they impact the PRR's (in)ability to deliver improved economic security for Sinhala singers, the book also offers policymakers recommendations on how to supplement current national copyright law and the PRR in order to provide a secure economic position for music artists in Sri Lanka.

Landmark Cases in Defamation Law is a diverse and engaging edited collection that brings together eminent scholars from the United Kingdom, the United States, Australia, Canada and New Zealand to analyse cases of enduring significance to defamation law. The cases selected have all had a significant impact on defamation law, not only in the jurisdiction in which they were decided but internationally. Given the formative influence of English defamation law in the United States, Australia, Canada and New Zealand, the focus is predominantly on English cases, although decisions of the United States and Australia are also included in the collection. The authors all naturally share a common interest in defamation law but bring different expertise and emphasis to their respective chapters. Among the authors are specialists in tort law, legal history and internet law. The cases selected cover all aspects of defamation law, including defamatory capacity and meaning; practice and procedure; defences; and remedies.

This sector-leading text covers Internet Law in its broadest terms, providing a concise yet comprehensive introduction to what is an exciting, fast-moving and complex area of law. Analysis focuses on each of the important elements within the subject, from the implications of online contracting, distance selling and online payment, to issues arising from the emergence of Web 2.0 and the growth of social networking sites. The author also considers data protection issues, freedom of expression and defamation, and the treatment of Internet-related crimes. The text is underpinned throughout by wide-ranging references which will prove invaluable to students at both undergraduate and postgraduate level, whilst the clarity and immediate nature of the coverage will provide illumination for all readers who have an interest in the subject. The text is supported by end-of-chapter summaries, suggested further reading and questions for consideration. A useful companion website featuring regular updates on the latest developments in the subject, and containing all weblinks listed in the text, can be found at: www.palgrave.com/law/rogers
