"What's a penguin to do, living at the South Pole, all dressed up with no place to go? What good is that natty tuxedo if there's no occasion to wear it? Well, these are no dumb penguins. They invite the Opera Ship from Old Vienna down for their amusement, and who are its illustrious passengers? You guessed it - none other than The Three Tenors, performing that South Pole favorite, Verdi's La Traviata, starring Jos\u00e9 Carreras as Alfredo, Placido Domingo as the disapproving father, and Luciano Pavarotti in the heartbreaking role of the tragic and tender Violetta. Some lucky penguins!

Der Alltag ist mehr als ein allt\u00e4glicher Tag. Er schreibt die Geschichten unseres Lebens - Geschichten voller Schmerz, Verwirrung, aber auch voller Freude und Hoffnung. Dabei h\u00e4lt der Alltag ein gro\u00dfes Potenzial f\u00fcr pers\u00f6nliche Weiterentwicklung bereit. Die Autorin nimmt die Leser/-innen mit auf eine Reise von A bis Z, und geht existenziellen Fragen wie G\u00fcck, Zufriedenheit, Neid, Liebe, Erfolg, Vergeltung u. v. m. nach. Das Buch versteht sich eher als Denk- denn als Ratgeber. Es bietet die Gelegenheit, an eigene Erfahrungen anzuk\u00fcpfen, den Blick auf den Alltag zu ver\u00e4ndern, Neues zu entdecken und vielleicht eine ganz individuelle Antwort auf die Frage zu finden, warum es so ist, wie es ist und wie es sein k\u00f6nnte.

The enigmatic relation between religion and science still presents a challenge to European societies and to ideas about what it means to be 'modern'. This book argues that European secularism, rather than pushing back religious truth claims, in fact has been religiously productive itself. The institutional establishment of new disciplines in the nineteenth century, such as religious studies, anthropology, psychology, classical studies, and the study of various religious traditions, led to a professionalization of knowledge about religion that in turn attributed new meanings to religion. This attribution of meaning resulted in the emergence of new religious identities and practices. In a dynamic that is closely linked to this discursive change, the natural sciences adopted religious and metaphysical claims and integrated them in their framework of meaning, resulting in a special form of scientific religiosity that has gained much influence in the twentieth century. Applying methods that come from historical discourse analysis, the book demonstrates that religious semantics have been reconfigured in the secular sciences. Ultimately, the scientification of religion perpetuated religious truth claims under conditions of secularism.
