More patients are diagnosed with autism, and at earlier ages, than ever before, and these patients and their families receive services in increasingly diverse settings. Destined to become a classic, this is the volume for which patients, families, and clinicians have been waiting.

A practical guide to adaptive behaviors across a range of neurodevelopmental disorders Adaptive behavior assessment measures independent living skills, including communication, social skills, personal care, and practical work skills. For individuals with intellectual disabilities, evaluation of these skills is a critical tool for measuring eligibility and can identify specific skills that must be learned before effective educational interventions can be implemented. Essentials of Adaptive Behavior Assessment of Neurodevelopmental Disorders describes the role of adaptive behavior in assessment and treatment, and provides clear guidance for measurement. Case samples provide real-world illustration of behaviors and assessment, and systematic comparison of various measures are presented and explained to better inform planning. Individual chapters outline specific adaptive behaviors across a range of neurodevelopmental disorders, giving clinicians, practitioners, students, and researchers a better understanding of diagnostic differentials and how to place independent skill programming in treatment and intervention. Plan intervention and treatment based on accessible measurement guidelines across a range of disorders Gain a deeper understanding of adaptive functioning specific to ADHD, autism spectrum disorders, disruptive behavior disorders, and genetic disorders Compare and contrast current measures to evaluate their strengths, weaknesses, and areas of overlap Quickly locate essential information with Rapid Reference and Caution boxes For individuals with neurodevelopmental disorders, adaptive behaviors are the keys to independence; without them, these individuals will perpetually struggle with achieving optimum independence without the basic skills needed to function at home, in school, and in the community. Assessment allows these skills to be factored in to treatment and intervention planning, and can help improve the outcomes of other intervention methods. Essentials of Adaptive Behavior Assessment of Neurodevelopmental Disorders clarifies the assessment of these important behaviors, helping clinicians make more informed decisions around diagnosis, education, and treatment planning.

A presentation designed to equip Emergency Medical Technicians with basic tools to better identify individuals with Autism Spectrum Disorders and provide tips to improve interactions.

According to the CDC, one in fifty American children is diagnosed as having an autism spectrum disorder. This means more school-aged children are entering classrooms with ASDs and teachers are being called upon to help facilitate their learning. Educating Young Children with Autism Spectrum Disorders is aimed at providing strategies for teachers, school counselors, and psychologists to help address the needs of children on the spectrum, as well as their families. Erin E. Barton and Beth Harn draw on current research and practices to discuss the possible causes of autism and to help prepare educators not only for teaching children in the classroom but also for providing families with the tools necessary to continue the educational process at home. Included are topics such as: Improving communication and socialization Developing instructive lessons Assessing students' progress Including families in educational goals Finding students' special interests and using those to help facilitate learning Managing challenging behavior And more Including forms, charts, and a range of classroom activities, this is the only resource you will need to gain the insight and tools for making a difference in the educational lives of young children with autism.

Award-winning autism expert Chantal Sicile-Kira presents a positive and empowering "bill of rights" for every person with autism. From an award-winning author and advocate, Autism Life Skills presents a positive and empowering "bill of rights" for every person with autism, regardless of impairment level. With advice and reflections from autistic adults across the spectrum, as well as Sicile-Kira's own experience as an advocate and parent of an autistic teen, the book covers these ten essential life skills: Making Sense of the World * Communication * Safety * Self-Esteem * Pursuing Interests * Self-Regulation * Independence * Social Relationships * Self-Advocacy * Earning a Living Whether your child or student has Asperger's or is on the more severely impaired end of the autism spectrum, this action-oriented guide will provide hope and help -- so that every child has a chance to reach his or her full potential.

This handbook details best practices and discusses ongoing challenges in assessment and diagnosis of autism spectrum disorder (ASD). Chapters address assessment and diagnostic protocols, developmental considerations in ASD assessment, and issues concerning comorbid psychological and medical conditions. Various aspects of the disorder are emphasized throughout the handbook - from assessment in adolescent and adult populations to the latest findings in neuropsychology. The book concludes with future directions for research and clinical applications, focusing on universal screening, improved assessment methods, and earlier and more accurate diagnosis. Topics featured in this handbook include: Types of ASD assessment. Report writing for ASD evaluations. Stress and satisfaction in the diagnostic process. Clinical and neuropsychological perspectives from comorbid diagnosis of ASD and ADHD. Executive functions in ASD. The Handbook of Assessment and Diagnosis of Autism Spectrum Disorder is an essential reference for researchers, clinicians, professionals, and graduate students in clinical child and school psychology, child and adolescent psychiatry, and social work as well as rehabilitation medicine/therapy, behavioral therapy, pediatrics, and educational psychology.
