Latest information, developments and statistics, with website addresses provided to allow students to access up to the minute, real-world data. Real-world examples throughout the text help students relate theory to practical situations.

New financial instruments—such as structured financial products and exchange-traded funds—and new financial institutions—including hedge funds and private-equity funds—present opportunities as well as policy and regulatory challenges in U.S. and Japanese financial markets. This book presents cutting-edge research from experts in academia and the financial industry on new instruments and new institutions while contrasting their developments in the different countries. The contributors highlight the innovative way in which Japanese financiers and government officials have learned from the U.S. regarding the introduction of new instruments into their market. New Financial Instruments and Institutions continues the productive collaboration between the Brookings Institution and the Nomura Institute of Capital Markets Research in examining current issues in capital and financial markets. Contributors include Jennifer Bethel (Babson College), Todd Broms (Managed ETFs, LLC), Frank Edwards (Columbia Business School), Allen Ferrell (Harvard

Law School), Yasuyuki Fuchita (Nomura Institute of Capital Markets Research), Gary Gastineau (Managed ETFs, LLC), Ken Lehn (University of Pittsburgh), Josh Lerner (Harvard Business School), Frank Partnoy (University of San Diego Law School), Adam Posen (Institute for International Economics), Ken Scott (Stanford Law School), Steve G. Segal (Boston University, J.W. Childs Associates), Yuta Seki (Nomura Institute of Capital Markets Research, New York), Erik Sirri (Babson College), and Randall Thomas (Vanderbilt Law School).

The substantially revised fifth edition of a textbook covering the wide range of instruments available in financial markets, with a new emphasis on risk management. Over the last fifty years, an extensive array of instruments for financing, investing, and controlling risk has become available in financial markets, with demand for these innovations driven by the needs of investors and borrowers. The recent financial crisis offered painful lessons on the consequences of ignoring the risks associated with new financial products and strategies. This substantially revised fifth edition of a widely used text covers financial product innovation with a new emphasis on risk management and regulatory reform. Chapters from the previous edition have been updated, and new chapters cover material that reflects recent developments in financial markets. The book begins with an introduction to financial markets, offering a new chapter that provides an overview of risk—including the key elements of financial risk management and the identification and quantification of risk. The book then covers market participants, including a new chapter on collective investment products managed by asset management firms; the basics of cash and derivatives markets, with new coverage of financial derivatives and securitization; theories of risk and return, with a new chapter on return distributions and risk measures; the structure of interest rates and the pricing of debt obligations; equity markets; debt markets, including chapters on money market instruments, municipal securities, and credit sensitive securitized products; and advanced coverage of derivative markets. Each chapter ends with a review of key points and questions based on the material covered.

Financial Institutions, Instruments and Markets dwells on alternative economic systems, analyses the constituents of an economy and the role played by money in a modern economy. It covers financial assets and also compares and contrasts equity and debt securities. Further it describes: Classification of markets and role of financial intermediaries Importance of financial institutions and their role Global securities markets

Financial Institutions and Markets focuses on the operation of Australia's financial system. Thoroughly updated, this eighth edition retains the structure of the seventh edition, examining the financial system's three main functions: settlement, flow-of-funds and risk transfer. The book provides a comprehensive and comprehensible integrated account of the activities of Australia's financial institutions and markets — and their instruments — including the major capital and foreign exchange markets, and the markets for derivatives. This new edition is complemented by digital resources on the MindTap online platform - also enabling flipped delivery of the content, expanded learning objectives, and updated case studies and research to cover recent events such as Brexit. Premium online teaching and learning tools are available to purchase on the MindTap platform Learn more about the online tools cengage.com.au/learning-solutions
