This book has been written with the intention of providing an up-to-the minute review of acute coronary syndromes. Atherosclerotic coronary disease is still a leading cause of death within developed countries and not surprisingly, is significantly rising in others. Over the past decade the treatment of these syndromes has changed dramatically. The introduction of novel therapies has impacted the outcomes and surviving rates in such a way that the medical community need to be up to date almost on a "daily bases". It is hoped that this book will provide a timely update on acute coronary syndromes and prove to be an invaluable resource for practitioners seeking new and innovative ways to deliver the best possible care to their patients.

Just days after the Germans surrendered at Stalingrad, legendary Red Army sniper Vasily Zaytsev described the horrors he witnessed during the five-month long conflict: "one sees the young girls, the children who hang from trees in the park... I have unsteady nerves and I'm constantly shaking." He was being interviewed, along with 214 other men and women—soldiers, officers, civilians, administrative staffers and others—amidst the rubble that remained of Stalingrad by members of Moscow's Historical Commission. Sent by the Kremlin, their aim was to record a comprehensive, historical documentary of the tremendous hardships overcome and heroic triumphs achieved during the battle. 20 soldiers of the 38th Rifle Division vividly recount how they stumbled upon the commander of the German troops, Field Marshal Friederich Paulus, defeated and hiding in a bed that reeked like a latrine. A lieutenant colonel remembers the brave 20 year-old adjutant who wrapped his arms around his commander's body to protect him from a flying grenade. Working around the clock, Nurse Vera Gurova describes a 24 hour period during which her hospital received over than 600 wounded men – equivalent to one every two and an half minutes. Countless soldiers endured shrapnel wounds and received blood transfusions in the trenches, but she can't forget the young amputee who begged her to avenge his suffering at Stalingrad. This harrowing montage of distinct voices was so candid that the Kremlin forbade its publication and consigned the bulk of these documents to a Moscow archive where they remained forgotten for decades, until now. Jochen Hellbeck's Stalingrad is a definitive portrait of perhaps the greatest urban battle of the Second World War—a pivotal moment in the course of the war re-created with absolute candor and chilling veracity by the voices of the men and women who fought there.

Have fun, save money, and improve your home with these easy step-by-step projects Are you looking for a way to make your bathroom a little more beautiful? Or maybe you'd like to give your tired furniture a face-lift, improve your home's air quality, or fix a toilet. No matter your DIY needs and no matter whether you're a DIY novice or expert, home improvement guru Andrea Ridout, host of the nationally syndicated radio show Ask Andrea, has ideas, expertise, and advice to share with you. If I Had a Hammer offers easy-to-follow instructions and illustrations designed to make home improvement simpler than ever. With a little help from Andrea, you'll be able to tackle repairs, painting and decorating, bathroom and kitchen remodeling, wood care for furniture and floors, and much more with projects that often take as little as an hour. Also, you can try a few of Andrea's energy-conserving projects that can dramatically improve your utility bill—Andrea's projects are friendly on the environment and on your wallet! With If I Had a Hammer, you'll have the tools to keep your home functioning and looking as good as—or even better than—new.

Provides an overall introduction to the welding process, illustrating most of the common equipment and work techniques for both the home and shop welding.

Discover a host of favorite quilts from Kim Brackett's much-loved books Scrap-Basket Surprises and Scrap-Basket Sensations. Be inspired by 12 fabulous scrappy designs—an excellent value Use convenient precut strips or cut your own; all projects are made using 2 1/2" strips Explore a variety of color palettes in a sparkling collection that highlights Kim's versatility as a designer

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedureuses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads todetermine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacture's blower performance tables). This assures that appropriate airflow is delivered toall rooms and spaces; and that system airflow is compatible with the operatingrange of primary equipment. The capabilities and sensitivities of this procedureare compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or avariable-speed blower (ECM or constant torque motor, or a true variable speed motor).Edition Three, Version 2.50 of Manual D (D3) specifically identifiesnormative requirements, and specifically identifies related informative material.

I quit college in 1980 and went to trade school for HVAC and it's the best career decision I've ever made because, to this day, I still love this trade. If I didn't get paid to do it, I'd do it for fun. Even though I put down the tools two years ago, I'm still deeply entrenched in hydronics as a writer for PHC News and as the owner of Mnnich Hydronic Consulting & Design, LLC. I can't imagine doing anything else. I'm a Boiler Guy to the core. Hard Knocks, My Life Inside Boiler Rooms takes an in-depth look at what it takes to be a top notch, heavyweight hydronic system service technician, installer, and designer from a guy who spent nearly 40 years in the trenches. You'll learn the proven methods of:\*Complete Hydronic System Design\*Radiant System Design\*Boiler Piping Prefabrication\*Pump Sizing\*Manual J Load Calculations\*Commercial CS&I Requirements\*Combustion Analysis\*Servicing Modulating Condensing Boilers\*Control Wiring \*Steam to Hot Water Conversion Musts\*Steam Efficiency\*A Unique Way to Approach Sales. I also share some engaging anecdotes of successes and the painful learning moments that lead to those successes. And I'm going to share with you pictures of my experiences, what to do, what not to do, and how to stay clear of trouble.
