Any significant event that has occurred in the history of man has always been about people. From global conquests to curing epidemics, inventing cars, space travel and even simplifying our daily lives with technology. Design thinking, the overhyped and less understood mindset has intentionally or unknowingly been at the heart of innovations-from the simplest of them by individuals to make household chores easier, that no one might ever hear about; to those by groups of brilliant scientists, lone innovators and hordes of selfless social volunteers working on improving lives the world over. Design thinking is essential yet elusive as something like kindness or charity or even ethics and morality. This book aims at demystifying the seemingly complex

but very fundamental yet essential mindset of design thinking to help you apply it to designing your business, your life, and possibly a better world.

“ Read this book and experience the freedom to create your reality. ”

—Deepak Chopra, MD, author of Total Meditation Don ’ t believe everything your mind tells you. Are you a chronic overthinker? Do you obsess to the point of feeling anxious, hopeless, angry, or stressed out? Have you ever tried to “ think your way out ” of one of these negative thought spirals, only to fall in deeper? Let ’ s face it: trying to escape your thoughts—or control them—just doesn ’ t work, and can actually make you more miserable in the long run. So, how can you overcome your addiction to thinking? In Can ’ t Stop Thinking,

work. Have you ever wondered why? Was it because life is unfair, or was it because you were actually "expecting the worst"? Have you considered expecting the best instead? You may think, "Of course, I considered great things to happen!," but science says otherwise. People who are preparing for something are found to be thinking more of the bad things that could happen than the positive outcomes. More often than not, thinking about unfortunate events actually make it happen. Hoping that you will not be late for a meeting will cause you to be late. Thinking of saying a complex sentence inappropriately actually makes you tongue-tied. Do you know why? It is because your thoughts have the power to change things and events. Our species is misnamed. Though sapiens defines human beings as "wise" what humans do especially well is to prospect the future. We are homo prospectus. In this book, Martin E. P. Seligman, Peter Railton, Roy F. Baumeister, and Chandra Sripada argue it is anticipating and evaluating future possibilities for the guidance of thought and action that is the cornerstone of human success. Much of the history of psychology has been

dominated by a framework in which people's behavior is driven by past history (memory) and present circumstances (perception and motivation). Homo Prospectus reassesses this idea, pushing focus to the future front and center and opening discussion of a new field of Psychology and Neuroscience. The authors delve into four modes in which prospection operates: the implicit mind, deliberate thought, mind-wandering, and collective (social) imagination. They then explore prospection's role in some of life's most enduring questions: Why do people think about the future? Do we have free will? What is the nature of intuition, and how might it function in ethics? How does emotion function in human psychology? Is there a common causal process in different

In this remarkable convergence of research in philosophy, statistics, decision theory, psychology, and neuroscience, Homo Prospectus shows how human prospection fundamentally reshapes our understanding of key cognitive processes, thereby improving individual and social functioning. It aims to galvanize interest in this new science from scholars in psychology, neuroscience, and philosophy, as well as an educated public curious about what makes humanity what it is.

computers really see and understand the world? Can games help us to study nature, save lives and design the future? Can you use computational thinking in your everyday activities? Yes, and this book shows you how. Computational thinking has changed the way we all live, work and play. It has changed the way science is done too; won wars, created whole new industries and saved lives. It is at the heart of computer programming and is a powerful approach to problem solving, with or without computers. It is so important that many countries now require that primary school children learn the skills. Professors Paul Curzon and Peter McOwan of Queen Mary University of London have written a unique and enjoyable introduction. They describe the elements of computational thinking —

Tell a stranger that you talk to yourself, and you ’ re likely to get written off as eccentric. But the truth is that we all have a voice in our head. When we talk to ourselves, we often hope to tap into our inner coach but find our inner critic instead. When we ’ re facing a tough task, our inner coach can buoy us up: Focus—you can do this. But, just as often, our inner

critic sinks us entirely: I ' m going to fail. They ' ll all laugh at me. What ' s the use? In *Chatter*, acclaimed psychologist Ethan Kross explores the silent conversations we have with ourselves. Interweaving groundbreaking behavioral and brain research from his own lab with real-world case studies—from a pitcher who forgets how to pitch, to a Harvard undergrad negotiating her double life as a spy—Kross explains how these conversations shape our lives, work, and relationships. He warns that giving in to negative and disorienting self-talk—what he calls “ chatter ” —can tank our health, sink our moods, strain our social connections, and cause us to fold under pressure. But the good news is that we ' re already equipped with the tools we need to make our inner voice

work in our favor. These tools are often hidden in plain sight—in the words we use to think about ourselves, the technologies we embrace, the diaries we keep in our drawers, the conversations we have with our loved ones, and the cultures we create in our schools and workplaces. Brilliantly argued, expertly researched, and filled with compelling stories, Chatter gives us the power to change the most important conversation we have each day: the one we have with ourselves.
