McLean explores Hayworth's participation in the creation of her star persona, particularly through her work as a dancer-a subject ignored by most film scholars.

Know What to Expect When Managing Medical Equipment and Healthcare Technology in Your Organization As medical technology in clinical care becomes more complex, clinical professionals and support staff must know how to keep patients safe and equipment working in the

clinical environment. Accessible to all healthcare professionals and managers, Medical Equipment Management presents an integrated approach to managing medical equipment in healthcare organizations. The book explains the underlying principles and requirements and raises awareness of what needs to be done and what questions to ask. It also provides practical advice and refers readers to appropriate legislation and guidelines. Starting from the medical equipment lifecycle, the book takes a risk-based approach to improving the way in which medical devices are acquired and managed in a clinical context. Drawing on their extensive managerial and teaching experiences, the authors explain how organizational structures and policies are set up, how funding is allocated, how people and equipment are supported, and what to do when things go wrong.

This book examines every aspect of anesthesia in patients undergoing cesarean section. Anesthetic and surgical techniques are clearly described, with detailed guidance on indications and contraindications and identification of potential complications. Practical information is provided on postoperative analgesia, postoperative course and nursing, the significance of cesarean section for breastfeeding, and the occurrence of long-term problems and chronic pain after cesarean section. Other topics to be addressed include the history and epidemiology of cesarean delivery, effects on the fetus and neonate, ethical issues, the humanization of childbirth, and maternal expectations and satisfaction. While many books are available on obstetric anesthesia, none is exclusively devoted to cesarean section although it is one of the most frequently performed surgeries. Anesthesia for Cesarean Section will be appreciated by all anesthesiologists and will be a useful source of information for obstetricians, gynecologists, midwives, nurses, medical students, and trainees.

As Britain's colonial secretary in the 1920s, Winston Churchill made a mistake with calamitous consequences and unseen repercussions extending into the twenty-first century. Christopher Catherwood, scholar and adviser to Tony Blair's government, examines Churchill's creation of the artificial monarchy of Iraq after World War One, forcing together unfriendly peoples—Sunni Muslim Kurds and Arabs, and Shiite Muslims—under a single ruler. Defying a global wave of nationalistic sentiment and the desire of subjugated peoples to rule themselves, Churchill put together the broken pieces of the Ottoman Empire and unwittingly created a Middle Eastern powder keg. Inducing Arabs under the thumb of the Ottoman Turks to rebel against rule from Constantinople, the British during WWI convinced the Hashemite clan that they would rule over Syria. However, Britain had already promised the territory to the French. To make amends after the Great War, Churchill created the nation called Iraq and made the Hashemite leader, Feisel, king of a land to which he had no connections. Catherwood examines Churchill's decision, which resulted in a 1958 military coup against the Iraqi Hashemite government and a series of increasingly bloody regimes until the ultimate nightmare of Ba'athist party rule under Saddam Hussein. Photographs and maps are included.

This brief text identifies the issues, resources, actors, and institutions involved in public policy making and traces the dynamics of the policymaking process, including the triggering of issue awareness, the emergence of an issue on the public agenda, the formation of a policy commitment, and the implementation process that translates policy into practice. Throughout the text, which has been revised and updated, Gerston brings his analysis to life with abundant examples from the most recent and emblematic cases of public policy making. At the same

time, with well-chosen references, he places policy analysis in the context of political science and deftly orients readers to the classics of public policy studies. Each chapter ends with discussion questions and suggestions for further reading.

Moments of Doubt is a collection of 20 essays and articles on mountaineering and adventure by David Roberts, selected from the published works of two decades. It showcases one of the most highly regarded writers in the field.

Michigan in the Novel records 1,735 novels published from 1816 through 1996 that are set wholly or partially in the state of Michigan. Consulting literally thousands of novels and visiting scores of libraries, Robert Beasecker spent more than twenty years researching this exhaustive bibliography. Works included are mainstream fiction, mystery and romance novels, juveniles, religious tracts, dime novels, and other marginal or popular genre literature. Omitted are short stories, poetry, drama, screenplays and pageants, and serially published novels with no subsequent separate publication. Through its six indexes, Michigan in the Novel provides literary and cultural access to Michigan novels, classifying novels by title, series, setting, chronology, subject and genre, and Michigan imprints. Intended to serve as a guide for students, teachers, scholars, and readers to explore Michigan's vast, varied, and rich literary landscape, Michigan in the Novel is the most expansive compilation of its kind.

This compelling study of the origins of all that exists, including explanations of the entire material world, traces the responses of philosophers and scientists to the most elemental and haunting question of all: why is anything here—or anything anywhere? Why is there something rather than nothing? Why not nothing? It includes the thoughts of dozens of luminaries from Plato and Aristotle to Aquinas and Leibniz to modern thinkers such as physicists Stephen Hawking and Steven Weinberg, philosophers Robert Nozick and Derek Parfit, philosophers of religion Alvin Plantinga and Richard Swinburne, and the Dalai Lama. The first accessible volume to cover a wide range of possible reasons for the existence of all reality, from over 50 renowned thinkers, including Plato, Aristotle, Aquinas, Descartes, Leibniz, Hume, Bertrand Russell, Stephen Hawking, Steven Weinberg, Robert Nozick, Derek Parfit, Alvin Plantinga, Richard Swinburne, John Polkinghorne, Paul Davies, and the Dalai Lama Features insights by scientists, philosophers, and theologians Includes informative and helpful editorial introductions to each section Provides a wealth of suggestions for further reading and research Presents material that is both comprehensive and comprehensible

On Gullstruck Island, legend has it that the mountain ranges and volcanoes are in charge. Anger them, and you'll pay the price. Keep them happy, and you'll enjoy their protection. These stories of the land's command come in handy for quiet, near-invisible Hathin when she must run for her life. Hathin's sister, Arilou, is believed to be a Lost. The Lost are held nearly sacred by those on Gullstruck, for they can send their senses away from their bodies. If Lost, Arilou can read a message across the island. If Lost, Arilou can hear whispers in the corners of private rooms. If Lost, Arilou can smell bread baking in the governor's mansion. All from her beachside hut. But the question remains: Is Arilou really a Lost? When all the Lost drop dead—except Arilou—she and Hathin are swept into a grand conspiracy that leads them to the most sinister depths—and heights—of the island.
