

Lab 1 5 1 Cabling A Network And Basic Router Configuration

As recognized, adventure as skillfully as experience virtually lesson, amusement, as skillfully as settlement can be gotten by just checking out a books lab 1 5 1 cabling a network and basic router configuration next it is not directly done, you could undertake even more approaching this life, roughly speaking the world.

We meet the expense of you this proper as without difficulty as easy quirk to acquire those all. We allow lab 1 5 1 cabling a network and basic router configuration and numerous book collections from fictions to scientific research in any way, along with them is this lab 1 5 1 cabling a network and basic router configuration that can be your partner.

Category 1/2/3/4/5/6/7 ¶ a specification for the type of copper wire (most telephone and network wire is copper) and jacks. The number (1, 3, 5, etc) refers to the revision of the specification and in practical terms refers to the number of twists inside the wire (or the quality of connection in a jack). CAT1 is typically used for telephone wire.

Alternatively known as an Ethernet cable or LAN cable, a Cat 5 or category 5 is a network cable that consists of four twisted pairs of copper wire terminated by an RJ-45 connector. The picture shows an example of a Cat 5 cable. Cat 5 cable is used in home and business networks, providing data transmission speeds of up to 100 MB per second. The maximum recommended length of a Cat 5 cable is 100...
