20+ Laryngeal Evaluation Indirect Laryngoscopy To High ...

Although indirect laryngoscopy is a " low-tech " method of laryngeal evaluation, facility with the technique requires significant practice, and most physicians have abandoned it in favor of the easily performed and well-tolerated flexible laryngoscopy. As a result, indirect laryngoscopy is rapidly becoming a lost art. Although the days of an otolaryngologist (let alone a primary care physician) wearing a head mirror may be numbered, indirect laryngoscopy is still commonly used as a ...

30 E-Learning Book Laryngeal Evaluation Indirect ...

After a solid introduction to laryngeal anatomy and physiology, separate sections cover the entire spectrum of laryngeal imaging systems. The authors place special emphasis on the interpretation of abnormal vibratory characteristics through practical discussion of the differential diagnosis of specific abnormalities and the impact of various types of laryngeal pathology on the vocal cords.

Laryngeal Evaluation: Indirect Laryngoscopy to High-Speed ...

Stroboscopy is not the only technique available for a detailed evaluation of laryngeal movement and pathology; others include electroglottography, videokymography, and high speed digital imaging, and some techniques may be complementary. 34 High speed digital processing has the advantage of capturing images as often as 5000 frames per second, acquiring many images from within a single glottic cycle, rather than relying on the multiple cycles that constitute the stroboscopic motion ...
