The Last Rights, or Viaticum, specifically refers to 3 sacraments. These are confession, the anointing of the sick, and final Holy Communion. Each of these is a way to cleanse a person's soul of sins in preparation for the afterlife. In the past, Last Rites were only given to those who were on their deathbed. It wasn't enough to simply be ill.

Last Rights examines end-of-life decisions in the context of the Roman Catholic tradition, a heritage rich in its teaching about the human person, the value of life, and the moral rights and responsibilities inherent to every human being. Written for Catholics seeking a better understanding of their own tradition, ministers who deal with Catholic patients, those who wish to learn more about the Catholic perspective, and ordinary decision-makers who must face these complex issues, Last Rights includes cross-references, a glossary, and an appendix and bibliography that provide resources for further study and helpful tools for end-of-life decision-making.

Written by William E. Berry, Sandra Braman, Clifford Christians, Thomas G. Guback, Steven J. Helle, Louis W. Liebovich, John C. Nerone, and Kim B. Rotzoll In Last Rights, eight communications scholars at the University of Illinois critique and expand on an influential classic that has been used as text or whipping boy in communications and journalism classes since the mid-1950s.The authors argue that Four Theories of the Press, now in its fourteenth printing, spoke to and for a world beset by a cold war that no longer exists. They also praise it for its value both as a curricular vehicle providing an alternative way of looking at the press and society and as a tool to help scholars and laypeople grapple with contradictions in classical liberalism. As much about the present and future as it is about the past, Last Rights also raises questions about the electronic superhighway, underscoring major changes that have taken place in communications systems and society since publication of the best-selling Four Theories.

Justice and Rights is a record of the fifth "Building Bridges" seminar held in Washington, DC in 2006 (an annual symposium on Muslim-Christian relations cosponsored by Georgetown University and the Church of England). This volume examines justice and rights from Christian and Muslim perspectivesa topic of immense relevance for both faiths in the modern world, but also with deep roots in the core texts of both traditions. Leading scholars examine three topics: scriptural foundations, featuring analyses of Christian and Muslim sacred texts; evolving traditions, exploring historical issues in both faiths with an emphasis on religious and political authority; and the modern world, analyzing recent and contemporary contributions from Christianity and Islam in the area of freedom and human rights.

Medical ethics draws upon methods from a wide array of disciplines, including anthropology, economics, epidemiology, health services research, history, law, medicine, nursing, philosophy, psychology, sociology, and theology. In this influential book, outstanding scholars in medical ethics bring these many methods together in one place to be systematically described, critiqued, and challenged. Newly revised and updated chapters in this second edition include philosophy, religion and theology, virtue and professionalism, casuistry and clinical ethics, law, history, qualitative research, ethnography, quantitative surveys, experimental methods, and economics and decision science. This second edition also includes new chapters on literature and sociology, as well as a second chapter on philosophy which expands the range of philosophical methods discussed to include gender ethics, communitarianism, and discourse ethics. In each of these chapters, contributors provide descriptions of the methods, critiques, and notes on resources and training. Methods in Medical Ethics is a valuable resource for scholars, teachers, editors, and students in any of the disciplines that have contributed to the field. As a textbook and reference for graduate students and scholars in medical ethics, it offers a rich understanding of the complexities involved in the rigorous investigation of moral questions in medical practice and research.

When the Universal Declaration of Human Rights was drafted in 1945, French Catholic philosopher Jacques Maritain observed, "We agree on these rights, providing we are not asked why. With the 'why,' the dispute begins." The world since then has continued to agree to disagree, fearing that an open discussion of the divergent rationales for human rights would undermine the consensus of the Declaration. Is it possible, however, that current failures to protect human rights may stem from this tacit agreement to avoid addressing the underpinnings of human rights? This consequential volume presents leading scholars, activists, and officials from four continents who dare to discuss the "why" behind human rights. Appraising the current situation from diverse religious perspectives -- Jewish, Protestant, Orthodox, Muslim, Confucian, and secular humanist -- the contributors openly address the question whether God is a necessary part of human rights. Despite their widely varying commitments and approaches, the authors affirm that an investigation into the "why" of human rights need not devolve into irreconcilable conflict.
