Linux Commands - Complete Guide

One shell to rule them all, one shell to find them, one shell to bring them all and in the same distro bind them. Command line is one of the many strengths of Linux based systems. Why is it a strength? There is no one answer; there are many answers.

How to Use the Linux Command Line: Basics of CLI - Linux.com

In all Linux commands you can use the '*' wildcard that you use in Windows, so to delete all files ending with .txt in Windows you would type 'del *.txt' whereas in Linux you would type 'rm -f *.txt'. Remember, we used the '-f' flag because we don't want to be asked to confirm the deletion of each file.
