This indispensable guide offers a complete picture of the road to recovery, and the specifics to move ahead with your life. When possible it encourages readers to resume their favorite hobbies, participate in athletic activities and return to the workplace. For the first time, leading medical specialists at the world-renowned Mayo Clinic offer their expert advice on everything from emotional adjustments, to skin care, to home and car modifications, to quality-of-life improvements. Easy-to-read, illustrated, and well organized, Mayo Clinic Guide to Living with A Spinal Cord Injury provides the "how-to" regarding the day-to-day challenges faced by anyone who has a spinal cord injury.

WHEELING AND DEALING evaluates the appropriateness of the biomedical and social models of understanding disability. 32 men and women living with spinal cord injury discuss their experiences and views on a wide range of topics including physical health, sexuality, dating, friendship, education, employment, religion and spirituality, and political and social ideologies. While respondents opinions challenge many widely-held myths about the disability, their views, are often at odds with those of disability activist scholars in the field.

The definitive guide for dealing with the major challenges those with spinal cord injuries face Medical advances have made it possible for those with spinal cord injuries to live an essentially normal life span! and to lead full' meaningful and productive lives. Inevitably' however' spinal injury superimposes special considerations on the routine activities and passages of life' and activities that might once have been easy can in many cases become increasingly difficult. This book identifies medical and nonmedical problems that individuals with SCI face as they get 'older' while providing practical advice on how to tackle these challenges. Includes information on health finances social support system the effects of aging.

From a hospital admittance to discharge to outpatient rehabilitation, Spinal Cord Injuries addresses the wide spectrum of rehabilitation interventions and administrative and clinical issues specific to patients with spinal cord injuries. Comprehensive coverage includes costs, life expectancies, acute care, respiratory care, documentation, goal setting, clinical treatment, complications, and activities of daily living associated with spinal cord patients. In addition to physical therapy interventions and family education components, this resource includes content on incidence, etiology, diagnosis, and clinical features of spinal cord injury. Case Studies with clinical application thinking exercises help you apply knowledge from the book to real life situations. Thoroughly referenced, evidence-based content provides the best evidence for treatment based on the most current research. Tables and boxes throughout each chapter organize and summarize important information for quick reference. Clinical Note boxes provide at-a-glance access to helpful tips. Over 500 clinical photos, line drawings, radiographs, and more bring important concepts to life. Highly respected experts in spinal cord injury rehabilitation, editors Sue Ann Sisto, Erica Druin, and Martha Sliwinski, provide authoritative guidance on the foundations and principles of practice for spinal cord injury. Companion DVD includes video clips of the techniques described throughout the book that demonstrate how to apply key concepts to practice.

Shortly before her death in 2004, Elisabeth Kjbler-Ross and David Kessler, her collaborator, completed the manuscript for this, her final book - a fitting completion to her work. Ku bler-Ross's groundbreaking work On Death and Dying changed the way we think and talk about the end of life. Weaving together theory, inspiration, and practical advice, this book will profoundly influence the way we experience the process of grief.Available only in Nonfiction 4.

"I thought life was pretty much over." Paul Herman "I was afraid people wouldn't see me for who I still was." Cathy Green "I didn't need this to be a better person." Susan Douglas "I wasn't sure I wanted to live 'this way.'" Kevin Wolitzky The above four people and 49 more just like them went on to find high levels of success and lead satisfying lives. Together they tell 53 stories of moving forward to meet all the challenges, fears, obstacles, and problems common to the life-altering circumstances after spinal cord injury, and doing it without benefit of wealth, large settlements or solid health coverage. Ranging in age from 21 to 67, disabled from three to 48 years they share 931 years of disability experience. Roll Models is a valuable new resource for recently injured people and their families, and for nurses, therapists, psychologists and all other professionals who treat, work with and care for people with spinal cord injury. Straight from the horse's mouth, survivors explore their experiences with disability and answer many questions those in rehab are asking: Early Thoughts What were your thoughts immediately following injury? What were your initial thoughts and reactions regarding SCI and the future? The First Years What were your biggest fears during that first year or so? How did you get past those early fears? Changes, Obstacles and Solutions How much different are you now, compared to how you were before injury? What's been the biggest obstacle? How did you address these obstacles? Finding What Works What have been the most difficult things for you to deal with since injury? What's the worst thing about having an SCI and using a chair? What's been your biggest loss due to injury? Is SCI the worst thing that ever happened to you? Tell me something about your problem solving skills. How do you deal with stress? What do you do to relieve stress? Salvations, Turning Points and More Was there any one thing that was your "salvation" or key to your success? Was there a turning point for you when you began to feel things were going to get better? What personal factors, habits and beliefs have helped you the most? SCI and Meaning Do you find any meaning, purpose or lessons in your disability? Did any positive opportunities come your way because of your injury? What's your greatest accomplishment? What are you most proud of? "A wonderful roadmap with many alternate routes to living and thriving with SCI." Minna Hong, SCI survivor and Peer Support Coordinator/Vocational Liaison, Shepherd Center "Avoids the trap of providing a 'one size fits all mentality' and provides solutions as varied as the individuals used as examples. Accentuates the positives while not sugar coating the difficulties. Essential reading." Jeff Cressy SCI survivor and Director of Consumer and Community Affairs, SCI Project, Rancho Los Amigos "A great resource for people as they venture out into the world, or search for meaning and a deeper, richer life. Filled with examples of real people and their real experiences." Terry Chase, MD, RN; SCI survivor; Patient & Family Education Program Coordinator, Craig Hospital "A wonderful tool for the newly spinal cord injured individual, as well as the therapists and counselors working with them. This certainly hits the mark in capturing important survival strategies." Jack Dahlberg, SCI survivor, Past President of the National Spinal Cord Injury Association "Artfully crafted and organized, Roll Models sensitively portrays life following spinal cord injury. Informative, creative, sensitive, as well as infused with humor and a kind heart. Recommended with my highest accolades." Lester Butt, Ph.D., ABPP, Director of the Department of Psychology, Craig Hospital
