3. The Divergence of MACD Trading. The divergence is one of the most popular strategies of MACD trading. However, it's also the least successful; especially when done without the help of other technical indicators and patterns. MACD divergence is when the price of a stock moves away from the MACD. It signals the end of a price movement or trend.

MACD Trading - Moving Average Convergence Divergence?

First, the MACD employs two Moving Averages of varying lengths (which are lagging indicators) to identify trend direction and duration. Then, it takes the difference in values between those two Moving Averages (MACD Line) and an EMA of those Moving Averages (Signal Line) and plots that difference between the two lines as a histogram which oscillates above and below a center Zero Line.
