1) Remove the air cleaner. With the engine running (remember to have your earmuffs hooked up to water or antifreeze.) Spray the lubricant into the air intake. It may cause the engine to run rough, smoke or stall. If the engine stalls while spraying the fogging lubricant, the engine is fogged and the process is complete.

3.0L Mercruiser 4cylinder - Dars small engine repair

Before putting your boat away for the winter, you must first winterize the motor. Your Mercruiser 3.0 uses the water in the lake to cool the engine while boating. This water stays inside the engine. Failure to remove the water will cause freezing. As the water freezes, it expands. This will cause the engine block to crack.

How to Winterize a Mercruiser 3.0 | It Still Runs

Mercury MerCruiser offers a range of gasoline engines with both angled tilt speakers (Sterndrives) and reverse gearboxes (Inboards) with high performance from 135 to 425 hp. All carburetor engines for convenience are equipped with an exclusive launch system TKS. You do not need any suction, no swap, no pre-fill fuel.

Mercury® Remanufacturing Plus-Series Alpha Sterndrives ...

I have a 2007 mercruiser 3.0 with TKS. IT is rough to cold start and idles rough until it reaches 165-170 degrees (based on temp guage) as soon as the hiss from teh TKS stops, she idles great. WHile tks is hissing, the idle is rough. When it is warm if i start it up, it stars immediatley and runs smooth.
