Gauge to ...~~

AWG or American Wire Gauge is the US standard measure for the diameter of electrical conductors. The American Wire Gauge chart is based on the number of dies originally required to draw the copper down to the required dimensional size. It means the higher the AWG number is, the smaller the wire diameter is.

The American Wire Gauge describes the wire's diameter; the metric (ISO) conductor sizes describe the nominal area of the cross section of the conductor. The actual cross-sectional areas depend in part upon the stranding of the cable. A cable with the AWG value shown will have at least as much carrying capacity as the metric cable for which it ...
