Key questions were selected according the criterion of clinical relevance.

Philadelphia-Negative Classical Myeloproliferative ...

Introduction. Myeloproliferative neoplasms (MPNs) are a rare, heterogeneous group of hematological disorders with shared biology¹, whereby abnormalities in hematopoietic stem cells transform myeloid progenitor cells leading to an overproduction of both mature and immature cells in one or more cell types of the myeloid lineage. The classic MPN entities include polycythemia vera (PV), essential ...
