dismissed as paranormal or disreputable, Jeff Meldrum gives us the first book on sasquatch to be written by a scientist with impeccable academic credentials, an objective look at the facts in a field mined with hoaxes and sensationalism. Meldrum reports on the work of a team of experts from a wide variety of fields who were assembled to examine the evidence for a large, yet undiscovered, North American primate. He reviews the long history of this mystery--which long predates the "bigfoot" flap of the late fifties--and explains all the scientific pros and cons in a clear and accessible style, amplified by
