[New Perspectives in Drug Design \(Rhone-Poulenc Rorer round ...](#)

Drug design is intrinsically involved in the discovery of a new drug: it can be incorporated into the identification of a lead compound by intelligent screening; involved when a new molecule for synthesis is created by computer or by intuition, based upon an intelligent understanding of the protein target; or in converting compounds such as peptides and carbohydrates into peptidomimetics or carbohydramimetics, retaining the original role of the compound while operating pharmaceutically.
