Section 31.1: Pathogens and Human Illness Flashcards | Quizlet

Pathogens can cause a variety of different diseases, with some being more severe than others. Human bodies are nutrient-rich and can provide a pathogen with an ideal environment in which to grow ...

Pathogens: Definition, types, diseases, prevention, and more

Only a few of the bacteria we encounter are pathogenic and can cause disease. Pathogens possess the inherent ability to cross anatomic barriers or breach other host defenses that limit the microbes that make up our normal flora. A significant part of human evolution has gone into developing ways to thwart microbial intrusion.

Host-Pathogen Interactions and Human Disease • iBiology

The 2019-nCoV infection caused clusters of severe respiratory illness similar to severe acute respiratory syndrome coronavirus and was associated with ICU admission and high mortality. Major gaps in our knowledge of the origin, epidemiology, duration of human transmission, and clinical spectrum of disease need fulfillment by future studies.
