~~While world history materials date back to prehistoric times, the field itself is relatively young. Indeed, when the first edition of Peter Stearns's best-selling World History in Documents was published in 1998, world history was poised for explosive growth, with the College Board approving the AP world history curriculum in 2000, and the exam shortly thereafter. At the university level, survey world history courses are increasingly required for history majors, and graduate programs in world history are multiplying in the U.S. and overseas. World events have changed as rapidly as the field of world history itself, making the long-awaited second edition of World History in Documents especially timely. In addition to including a new preface, focusing on current trends in the field, Stearns has updated forty percent of the textbook, paying particular attention to global processes throughout history. The book also covers key events that have altered world history since the publication of the first edition, including terrorism, global consumerism, and environmental issues.~~

~~Designed for introductory-level survey courses in World History. The primary goal of "World Civilizations" is to present a truly global history--from the development of agriculture and herding to the present. Using a unique periodization, this book divides the main periods of human history according to changes in the nature and extent of global contacts. This global world history text emphasizes the major stages in the interactions among different peoples and societies, while at the same time assessing the development of major societies. Encompassing social and cultural as well as political and economic history, the book examines key civilizations in world history. "World Civilizations" balances this discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact.~~

~~Taureans, ever wondered what the Sun-signs tell you about love and life? This unique anthology of poems for love and life relates directly to your Sun-sign, Taurus. If you were born between the 21st of April and the 21st of May, you will relate to many of the themes identified with your sign's characteristics and personality traits. The poems in this collection have been chosen because they reflect a Taurean attitude to life. They appeal to the interests 'ruled' by your sign; the animals, flowers, trees, plants and places celebrated by the poets and associated with the sign of Taurus over three thousand years of traditional astrology. Some have been chosen simply because we believe you will enjoy them, and that they will awaken or re-awaken your love of poetry.~~

~~Yet another general history of the world from the earliest humans through to the modern period. This book approaches world history from a purely social perspective assessing aspects such as 'patterns of birth and death, basic value systems, relationships with government, interaction between men and women, and how people work and play'. Arranged chronologically, the chapters cover all major areas including Europe, Africa, Asia and the Americas, and address key themes in the development of societies and civilisations: population patterns, religion, gender and work relationships, material culture and social activities. Half of the book covers the period 1450 to the present-day.~~

~~The industrial revolution was the single most important development in human history over the past three centuries, and it continues to shape the contemporary world. With new methods and organizations for producing goods, industrialization altered where people live, how they play, and even how they define political issues. By exploring the ways the industrial revolution reshaped world history, this book offers a unique look into the international factors that started the industrial revolution and its global spread and impact. In the fourth edition, noted historian Peter N. Stearns continues his global analysis of the industrial revolution with new discussions of industrialization outside of the West, including the study of India, the Middle East, and China. In addition, an expanded conclusion contains an examination of the changing contexts of industrialization. The Industrial Revolution in World History is essential for students of world history and economics, as well as for those seeking to know more about the global implications of what is arguably the defining socioeconomic event of modern times.~~

~~World Civilizations, AP® Edition encourages students to grasp concepts and patterns across a huge breadth of time and space and helps to facilitate global understandings and connections in the classroom. This text captures a truly global approach by discussing and comparing major societies and focusing on their interactions. World Civilizations, AP® Edition presents a clear factual framework while stimulating analysis about global contacts, regional patterns, and the whole process of change and continuity on a world stage. This text identifies six periods in world history. Each period is determined by three basic criteria: a geographical rebalancing among major civilizational areas, an increase in the intensity and extent of contact across civilizations (or, in the case of the earliest period, crossregional contact), and the emergence of new and roughly parallel developments in many major civilizations. Based on "comparative work and focuses on global processes," this text helps students see the history of the world as one based on multiple disciplines. - Publisher.~~

~~Offers a range of documents that illustrates civilizations from key stages in world history, with special attention to comparing major societies. Documents in World History is a thematically organized, authoritative collection of original sources that highlight political, social, cultural and economic issues in world history. The text also provides documents on the hot topics of gender and cultural history. Revised and updated with over a quarter of the documents new, the sixth edition retains its global emphasis. Standard selections and political coverage have been improved, and attention to Islam and Christianity as well as South Asia have been expanded.
