Pioneers of Representation Theory:

Frobenius, Burnside, Schur, and Brauer.

Discusses representations of finite groups.

This book contains some of the results involving characters of finite abelian groups by Lagrange, Gauss, and Dirichlet. It is suitable for a course on representations of finite groups.

AMS :: Curtis: Pioneers of Representations  
Theory

Historically, the representation theory of finite groups was developed with the same motivation: Turning problems in group theory into problems in linear algebra. The study began with Cauchy and Dedekind ' s work in the early 1800s on what later became character theory [Cau41, Ded85, Tau33].

However, Frobenius was the first mathematician to

Representation and Character Theory of the Small Mathieu ...

In Pioneers of Representation Theory he has set to present the historical development of the main ideas of the discipline, starting in the 1890s with the work of Georg Ferdinand Frobenius and up until 1960.

## Pioneers Of Representation

Curtis, Charles W. Pioneers of Representation theory ...

KEITH CONRAD Abstract. Representation theory was created by Frobenius about 100 years ago. We describe the background that led to the problem which motivated Frobenius to define characters of a finite group and show how representation theory solves the problem. The first results about representation theory in characteristic  $p$  are also discussed.
