A continuation of the documentary “No End in Sight” draws on new interviews to argue that the financial crisis occurred because of decades of deregulation that enabled the financial sector to commit industrial-scale fraud.

Based on explosive interviews, court documents and corporate archives, Inside Job traces in gripping detail how decades of deregulation gave birth to a predator nation, with power players cycling through positions in government, academia and Wall Street - and continuing to do so even in the wake of the global financial crisis. With stunning clarity, Charles Ferguson delivers an uncompromising accounting of how a new economic oligarchy has wrested control of our politics and the prospects for real recovery.

The United States is more vulnerable today than ever before—including during the Great Depression and the Civil War—because the pillars of democracy that once supported a booming middle class have been corrupted, and without them, America teeters on the verge of the next Great Crash. The United States is in the midst of an economic implosion that could make the Great Depression look like child’s play. In THE CRASH OF 2016, Thom Hartmann argues that the facade of our once-great United States will soon disintegrate to reveal the rotting core where corporate and billionaire power and greed have replaced democratic infrastructure and governance. Our once-enlightened political and economic systems have been manipulated to ensure the success of only a fraction of the population at the expense of the rest of us. The result is a “for the rich, by the rich” scheme leading to policies that only benefit the highest bidders. Hartmann outlines the destructive forces-planted by Lewis Powell in 1971 and come to fruition with the “Reagan Revolution”—that have looted our nation over the past decade, and how their actions fit into a cycle of American history that lets such forces rise to power every four generations. However, a backlash is now palpable against the “economic royalists”—a term coined by FDR to describe those hoarding power and wealth—including the bankers, oligarchs, and politicians who have plunged our nation into economic chaos and social instability. Although we are in the midst of what could become the most catastrophic economic crash in American History, a way forward is emerging, just as it did in the previous great crashes of the 1760s, 1856, and 1929. The choices we make now will redefine American culture. Before us stands a genuine opportunity to embrace the moral motive over the profit motive—and to rebuild the American economic model that once yielded great success. Thoroughly researched and passionately argued, THE CRASH OF 2016 is not just a roadmap to redemption in post-Crash America, but a critical wake-up call, challenging us to act. Only if the right reforms are enacted and the moral choices are made, can we avert disaster and make our nation whole again.

In the aftermath of the Financial Crisis, many commonly held beliefs have emerged to explain its cause. Conventional wisdom blames Wall Street and the mortgage industry for using low down payments, teaser rates, and other predatory tactics to seduce unsuspecting home owners into assuming mortgages they couldn’t afford. It blames average Americans for borrowing recklessly and spending too much. And it blames the tax policies and deregulatory environment of the Reagan and Bush administrations for encouraging reckless risk taking by wealthy individuals and financial institutions. But according to Unintended Consequences, the conventional wisdom masks the real causes of our economic disruption and puts us at risk of facing a slew of unintended-and potentially dangerous—consequences.

Examines American policy in Iraq, from the Bush Administration’s push for war to the chaotic aftermath of the invasion, and includes interviews with civilian and military officials, soldiers, and journalists.

The global financial crisis has made it painfully clear that powerful psychological forces are imperiling the wealth of nations today. From blind faith in ever-rising housing prices to plummeting confidence in capital markets, “animal spirits” are driving financial events worldwide. In this book, acclaimed economists George Akerlof and Robert Shiller challenge the economic wisdom that got us into this mess, and put forward a bold new vision that will transform economics and restore prosperity. Akerlof and Shiller reassert the necessity of an active government role in economic policymaking by recovering the idea of animal spirits, a term John Maynard Keynes used to describe the gloom and despondence that led to the Great Depression and the changing psychology that accompanied recovery. Like Keynes, Akerlof and Shiller know that managing these animal spirits requires the steady hand of government—simply allowing markets to work won’t do it. In rebuilding the case for a more robust, behaviorally informed Keynesianism, they detail the most pervasive effects of animal spirits in contemporary economic life—such as confidence, fear, bad faith, corruption, a concern for fairness, and the stories we tell ourselves about our economic fortunes—and show how Reaganomics, Thatcherism, and the rational expectations revolution failed to account for them. Animal Spirits offers a road map for reversing the financial misfortunes besetting us today. Read it and learn how leaders can channel animal spirits—the powerful forces of human psychology that are afoot in the world economy today. In a new preface, they describe why our economic troubles may linger for some time—unless we are prepared to take further, decisive action.

Reveals the mishandling of the TARP bailout fund, sharing how Geithner and his team failed to fix flaws in the homeowner relief program and that the government served Wall Street’s interests over the broader public.

A chronicle of the events that led to the current economic troubles cites the promotion of the idea that self-interest guides society more effectively than community concerns, and traces the roles played by a few powerful individuals.

The financial crisis is destroying wealth but is also a remarkable opportunity to uncover the ways by which debt can be used to regulate the economic system. This book uses four case studies of cooperatives to give an in-depth analysis on how they have braved the crisis and continued to generate wealth.

Definitive leadership strategy for fixing the American economy, drawn from Gallup ’ s unmatched global polling and written by the company ’ s chairman. What everyone in the world wants is a good job. “ This is one of the most important discoveries Gallup has ever made,” says the company ’ s Chairman, Jim Clifton. In The Coming Jobs War, Clifton makes the bold assertion that job creation and successful entrepreneurship are the world ’ s most pressing issues right now, outpacing runaway government spending, environmental degradation and even the threat of global terrorism. The book is grounded in findings from Gallup ’ s World Poll, which reveals the implications of the jobs war on everything from economics to foreign policy to nothing less than America ’ s moral authority in the world. And it offers a prescription for attacking the jobs issue head-on. Clifton argues that the solution to creating good jobs must be found in cities, not in the federal government. Promoting entrepreneurship and job creation must be the sole mission and purpose of cities ’ business leaders, government officials and philanthropists. Clifton says that the next big breakthrough will come from the combination of the forces within big cities, great universities and powerful local leaders. Their combined effect is the most reliable, controllable and predictable solution to America ’ s biggest problem. Strong leadership teams and a natural order are already in place within cities — in governments and local business and philanthropic entities, with caring leaders working on initiatives to fuel local economic growth and to create good jobs. The feat these leaders have to pull off is doubling their entrepreneurial energy by aligning their local forces: local tribal leaders, super-mentors and universities. Winning the jobs war will require all hands on deck, and failure is not an option, especially for the United States, which has been the global leader in promoting freedom and entrepreneurship. America ’ s place in the world is at stake, and there are other countries poised to surpass a sputtering U.S. economy that is currently growing at only 2% annually. The biggest threat? China, with a GDP that is increasing at nearly 10% annually — a pace that will make it the world ’ s leading and most influential economy within the next 30 years. While the statistics are dire, Clifton remains optimistic about America ’ s ability to win the jobs war because America has been here before. “ The Greatest Generation saved America by beating the Japanese and Germans at [World War II]. The Baby Boomers saved America a second time by beating the same foes, Japan and Germany, in an economic war that determined the leadership of the free world, again,” he says. The Coming Jobs War offers a clear, brutally honest look at America ’ s biggest problem and a cogent prescription for solving it.
