Ratio and Proportion - Aptitude Questions and Answers

Let us write the proportion with the help of the 10/20 ratio from above:  $? 42 = 10 20$ . Now

## Download File PDF Proportion Questions And Answers

we solve it using a special method: Multiply across the known corners, then divide by the third number. And we get this:  $? = (42 \times 10) / 20 = 420 / 20 = 21$ . So you should draw the head 21 long.

### Proportions - MATH

When two ratios are equal, they make a proportion, i.e. if  $a/b = c/d$ , then a, b, c and d are in proportion. This is represented as  $a:b :: c:d$ . When a, b, c and d are in proportion, then a and d are called the Extremes and b and c are called the Means, also Product of the Means = Product of the
