Illinois RURAL TWO-LANE/MULTILANE STATE HIGHWAYS October 2015. HARD COPIES UNCONTROLLED 47-2.1. 47-2 TWO-LANE HIGHWAYS 47-2.01 General. The minimum design for a State route is a two-lane, two-way highway. In some areas of the State, the two-lane highway system carries a large portion of the rural traffic.

## Rural Two-Lane/Multilane Highways

To a driver unfamiliar with the local area, a frontage road takes on the appearance of a separate roadway of a multilane divided facility, thus resulting in the assumption that the two-way, two-lane highway is a one-way roadway.

## Roadway Design Manual: Two-Lane Rural Highways

▯ Multilane Highways ▯ Sections of multilane highways (four or six lane) that are more than two miles from the nearest point of fixed operation ▯ Rural Two-lane Highways ▯ Sections of two-lane highways (one lane in each direction) that are more than two miles from the nearest point of fixed operation

## HIGHWAY SAFETY MANUAL USER GUIDE

5.9.1. Clarified that the single-lane roundabout is the Department's preferred intersection type. Multilane roundabouts offer substantial capacity benefits but may increase the frequency of crashes. Former Updated LOS chart. Exhibit 5-22 (Now Exhibit 2-26) Former Removed Pedestrian LOS Chart. Exhibit 5-23

## HIGHWAY DESIGN MANUAL - New York State Department of ...

The 1950 HCM [1] recognized the critical interaction between directional flows on a two-lane, two-way rural highway. Because of this, in 1950 and 1965, the models for two-lane highways dealt with both directions simultaneously. In 1950, it was argued that to keep a single lane in one direction fully utilized, that passing opportunities had to be unrestricted by alignment, sight distance, or the existence of flow in the opposite direction.

CPM includes capabilities to evaluate rural two-lane highways, rural multilane highways, urban/suburban arterials, freeway segments, and freeway ramps/interchanges (including ramps, collector-distributor (C-D) roads, and ramp terminals). Crash prediction methods for 6 or more lanes and 1-way urban/suburban arterials were added to Interactive ...

Crash Prediction Module | FHWA - Transportation state two-lane rural highway system in Washington. The findings indicate that random parameter models and heterogeneous negative binomial models with dispersion parameter models as functions of roadside variables are effective in capturing the simultaneous impact of roadway and roadside geometrics on two-lane rural roadway safety performance.

## Two-Lane Rural Highways

Recent discussions at various meetings related to the production of the Manual have shown that the predictive methodologies for chapters related to rural two-lane highways (HSM Chapter 10), rural multilane highways (HSM Chapter 11) and urban and suburban arterials (HSM Chapter 12) lack relevant examples that would help practitioners, traffic engineers and design engineers put into practice the methodology described in these chapters.
