A compelling personal account of living through the atrocities as Rhodesia became Zimbabwe, whilst bringing up a family on a farm amidst the chaos. As a trained nurse, newly married to the son of the Governor of Rhodesia during the UDI years, Susan writes compellingly about bringing up a family on their farm in Matabeleland in the midst of the unfolding terror and growing number of atrocities. Above all it is a human story. Sometimes shocking and always moving, there is also warmth and humour as Susan creates a gripping picture of the conflict and tells of her family's survival when many of her friends and neighbouring farmers didn't. The book is a testament to the courage displayed by so many people who were tested day after day by almost unimaginable horrors.

"It's hard to align with money if you think that it is evil and nasty. But once you come to an understanding that money is neutral, it's easy to see that having money does not necessarily deprive somebody else. There's no reason why you can't be very rich and still be an extremely spiritual and wonderfully generous person—aligned to the God Force—with a huge heart, and compassion for everyone you meet." — Stuart Wilde

In this book, Dr. Li and his author team plan to emphasize why mouse models are useful in vivo systems for understanding disease mechanisms and developing therapeutic strategies in blood cancers. The authors do not intend to cover all types of blood cancers; instead, they will focus on some major ones such as leukemias and lymphomas. However, the authors will try to cover as much as they can the cancer types and point out that many blood cancers need to be studied in mouse disease models although they are still not available at present. A major focus in the book will be to show what we can or cannot learn from mouse disease models and to also show the critical contributions of mouse models in therapeutic drug development.

An analysis of Derrida's early work engaging Plato, Hegel, and the life sciences. *Germs of Death* explores the idea of genesis, or dissemination, in the early work of Jacques Derrida. Looking at Derrida's published and unpublished work from "Force and Signification" in 1963 to *Glas* in 1974, Mauro Senatore traces the development of Derrida's understanding of genesis both linguistically and biologically, and argues that this topic is an overlooked thread that draws together Derrida's readings of Plato and Hegel. Demonstrating how Derrida's analysis liberates the understanding of genesis from Platonic and Hegelian presupposition, Senatore also highlights Derrida's engagement with the biological thought of his day. Senatore also shows that the implications of Derrida's insights extend into contemporary ethical and political questions relating to postgenomic conceptions of life. "Senatore here demonstrates with stunning insight, clarity, and economy that Derrida's work of the 1960s and '70s needs to be understood as a radical critique or deconstruction of both the philosophical concept of life (from Plato to Hegel) and the prevailing biological model of heredity as a "genetic program." It will be impossible henceforth to read Derrida on questions of the trace, dissemination, life, and so on, without coming to terms with "the germs of death." — Michael Naas, author of *The End of the World and Other Teachable Moments: Jacques Derrida's Final Seminar* "The book represents a major contribution to the field of Derrida studies and phenomenology, particularly its attention to the concept of genesis that formed the basis of Derrida's earliest study of Husserl and the origin of his concept of writing. The unique contribution is the inclusion of the works from the periods of the mid-1970s, which have been neglected in the mainstream scholarship on Derrida." — Gregg Lambert, author of *Philosophy after Friendship: Deleuze's Conceptual Personae*

Richard is fishing one day when he sees a camper pull into the campsite near where he is. A couple steps out, and then when he sees a boy, he couldn't help admiring him. The boy introduces himself as Kelly and makes small talk. As Richard looks up from his perch, he spots Kelly's big dick through the open leg of his shorts. Instead of being annoyed, Kelly even shows his boner and dares Richard to show his. They go to the camper, where they indulge in some mind-blowing oral sex. But the following day, Richard is sure it's going to be a lot different, what with Kelly's buddies joining in on the fun.
