On television, Wal-Mart employees are smiling women delighted with their jobs. But reality is another story. In 2000, Betty Dukes, a fifty-two-year-old black woman in Pittsburg, California, became the lead plaintiff in Dukes v. Wal-Mart Stores, a class action, representing 1.6 million women. In her explosive investigation of this historic lawsuit, journalist Liza Featherstone reveals how Wal-Mart, a self-styled "family-oriented," Christian company: Deprives women (but not men) of the training they need to advance. Relegates women to lower-paying jobs like selling baby clothes, reserving the more lucrative positions for men. Inflicts punitive demotions on employees who object to discrimination. Exploits Asian women in its sweatshops in Saipan, a U.S. commonwealth. Featherstone goes on to reveal the creative solutions that Wal-Mart workers around the country have found, like fighting for unions, living-wage ordinances, and childcare options. Selling Women Short combines the personal stories of these employees with superb investigative journalism to show why women who work these low-wage jobs are getting a raw deal, and what they are doing about it. A new preface to the paperback edition will reflect on Wal-Mart's response to this lawsuit and its critics—including this one.

Hillary Rodham Clinton is one of the most powerful women in world politics, and the irrational right-wing hatred of Clinton has fed her progressive appeal, helping turn her into a feminist icon. To get a woman in the White House, it's thought, would be an achievement for all women everywhere, a kind of trickle-down feminism. In the run-up to the 2016 presidential election, the mantle of feminist elect has descended on Hillary Clinton, as a thousand viral memes applaud her, and most mainstream feminist leaders, thinkers, and organizations endorse her. In this atmosphere, dissent seems tantamount to political betrayal. In False Choices, an all-star lineup of feminists contests this simplistic reading of the candidate. A detailed look at Hillary Clinton's track record on welfare, Wall Street, criminal justice, education, and war reveals that she has advanced laws and policies that have done real harm to the lives of women and children across the country and the globe. This well-researched collection of essays restores to feminism its revolutionary meaning, and outlines how it could transform the United States and its relation to the world. Includes essays from prominent feminist writers Liza Featherstone, Laura Flanders, Moe Kucick, Medea Benjamin, Frances Fox Piven and Fred Block, Donna Murch, Kathleen Geier, Yasmin Nair, Megan Erickson, Tressie McMillan Cottom, Catherine Liu, Amber A'Lee Frost, Margaret Corvid, Belén Fernández, Zillah Eisenstein, and others.

Over the course of the last century, the focus group has become an increasingly vital part of the way companies and politicians sell their products and policies. Few areas of life, from salad dressing to health care legislation to our favorite TV shows, have been left untouched by the questions put to controlled groups about what they do and don't like. Divining Desire is the first-ever popular survey of this rich topic. In a lively, sweeping history, Liza Featherstone traces the surprising roots of the focus group in early-twentieth century European socialism, its subsequent use by the "Mad Men" of Madison Avenue, and its widespread deployment today. She also explores such famous "failures" of the method as the doomed launch of the Ford Edsel with its vagina shaped radiator grille, and the even more ill-fated attempt to introduce a new flavor of Coca Cola (which prompted street protests from devotees of the old formula). As elites have become increasingly detached from the general public, they rely ever more on focus groups, whether to win votes or to sell products. And, in a society where many feel increasingly powerless, the focus group has at least offered the illusion that ordinary people will be listened to and that their opinions count. Yet, it seems the more we are consulted, the less power we have. That paradox is particularly stark today, when everyone can post an opinion on social media—our 24 hour "focus group"—yet only plutocrats can shape policy. In telling this fascinating story, Featherstone raises profound questions about democracy, desire and the innermost workings of consumer society.

This valiant story of how young George Washington was drawn into this country's struggle for independence gives readers a vivid perspective on a crucial era in American history—and on the life of a revolutionary hero.

Now that Wal-Mart has conquered the US, can it conquer the world? As Wal-Mart World shows, the corporation is certainly trying. For a number of years, Wal-Mart has been the largest company in the United States. Now, though, it is the largest company in the world. Its global labor practices and outsourcing strategies represent for many what contemporary economic globalization is all about. But Wal-Mart is not standing still, and is opening up stores everywhere. From Germany to Beijing to Mexico City to Tokyo, more than a billion shoppers can now hunt for bargains at a Wal-Mart superstore. Wal-Mart World is the first book to look at this incredibly important phenomenon in global perspective, with chapters that range from its growth in the US and impact on labor relations here to its fortunes overseas. How Wal-Mart manages this transition in the near future will play a significant role in the determining the character of the global economy. Wal-Mart World's impressively broad scope makes it necessary reading for anyone interested in the global impact of this economic colossus.

Necessary Trouble is the definitive book on the movements that are poised to permanently remake American politics. We are witnessing a moment of unprecedented political turmoil and social activism. Over the last few years, we've seen the growth of the Tea Party, a twenty-first-century black freedom struggle with BlackLivesMatter, Occupy Wall Street, and the grassroots networks supporting presidential candidates in defiance of the traditional party elites. Sarah Jaffe leads readers into the heart of these movements, explaining what has made ordinary Americans become activists. As Jaffe argues, the financial crisis in 2008 was the spark, the moment that crystallized that something was wrong. For years, Jaffe crisscrossed the country, asking people what they were angry about, and what they were doing to take power back. She attended a people's assembly in a church gymnasium in Ferguson, Missouri; walked a picket line at an Atlanta Burger King; rode a bus from New York to Ohio with student organizers; and went door-to-door in Queens days after Hurricane Sandy. From the successful fight for a 15 minimum wage in Seattle and New York to the halting of Shell's Arctic drilling program, Americans are discovering the effectiveness of making good, necessary trouble. Regardless of political alignment, they are boldly challenging who wields power in this country.
