Who you are and where you live are associated with health behaviours and outcomes (see Cummins et al., 2007). On average, those who are socioeconomically disadvantaged or live in deprived neighbourhoods experience higher levels of disease and die earlier compared with those more advantaged (Do and Finch, 2008). Neighbourhood research on health has centred on a 'context' and 'composition' dichotomy.

~~Locality, neighbourhood and health: a literature review~~

Shaping Neighbourhoods For Local Health and Global Sustainability, 2nd Edition Hugh Barton, Marcus Grant & Richard Guise This substantially revised and important second edition responds to a changing agenda in government policy and planning practice, putting issues of climate change and obesity at the centre of its concern.
