The outdoor portion of a mini split air conditioner is called a compressor, and you can typically choose between two types: a rotary compressor and an inverter compressor. Rotary compressors are the most common type; they essentially turn the air conditioner on and off to regulate temperature.

[6 Best Mini-Split Air Conditioners - Dec. 2020 - Best Reviews](#)

In a ductless mini-split air conditioner, the hot air is sucked inside the unit. It is cooled using the refrigeration system in the air conditioner, and then this cool air is pushed out of the unit into the room. This system does not require a duct and burdensome installation process for this wall mounted air conditioner to work.

[Wall Mounted Air Conditioners Buying Guide](#)

The most important factors when choosing a ductless split air conditioner are BTUs, number of cooling zones, and installation type. Zones A single zone ductless split system will have one evaporator, or air handler (indoor unit), and one condenser (outdoor unit). If you want to cool more than one area, a multiple zone split system applies two, three, or four (depending on the model) indoor units to one condenser.

[Ductless Mini-Split Air Conditioners Buying Guide](#)

An air conditioner can either have a slide-out chassis sleeve or a traditional through-the-wall sleeve. A slide out chassis is essentially a built-in sleeve that comes with the unit. Before replacing an AC, determine the type of existing sleeve. If your AC only vents in the back, then it uses a through-the-wall sleeve.

Ductless air conditioners: Also known as split air conditioners, these have an indoor section connected to an outdoor unit by a small pipe. While they're the most efficient of the different types...

[Best smart air conditioners in 2020 | Tom's Guide](#)

Air conditioners installed into a wall function the same as window air conditioners: they are single, self-contained units that exhaust heat and humidity from the room to the outside. Louvers (located on either the back or the back and sides of the unit) bring in fresh air.

[Wall Air Conditioners Buying Guide](#)

Central air conditioners are the quietest (10dB) and ductless mini split systems follow (20dB). Window air conditioners and through the wall AC units are quite tolerable (50dB) since the noisiest part of the systems are located outdoors or in another room. Portable air conditioners are the loudest (70dB) and can be as loud as a vacuum cleaner.
