This concise yet comprehensive guide to the methods and protocols of immunohistochemistry covers established techniques and current developments in the field such as the use of epitope tags, multiple immunolabeling and diagnostic immunohistochemistry.

TV presenter, writer and adventurer Alice Morrison gives her own unique and personal insight into Morocco, her home for 1001 nights. When Alice Morrison headed out to Morocco, it was to take on one of the most daunting challenges: to run in the famous Marathon des Sables. Little did she expect to end up living there. But as soon as she settled in a flat in Marrakech, she was won over by the people, the spectacular scenery and the ancient alleyways of the souk. Soon she was hiking over the Atlas mountains, joining nomads to sample their timeless way of life as they crossed the Sahara desert, and finding peace in a tranquil oasis. Despite more than 10 million tourists coming to Morocco each year, there is remarkably little that has been written about its people, their customs and the extraordinary range of places to visit, from bustling markets to vast, empty deserts. Alice makes sure she samples it all, and as she does she provides a stunning portrait of a beautiful country. As a lone woman, she often attracts plenty of curiosity, but her willingness to participate - whether thigh deep in pigeon droppings in a tannery or helping out herding goats - ensures that she is welcomed everywhere by a people who are among the most hospitable on the planet. Alice came to fame with her BBC2 series Morocco to Timbuktu, and now she joins the ranks of great travel writers who can bring a country vividly to life and instantly transport the reader to a sunnier place. If you're thinking of going to Morocco, or you want to recall your time there, My 1001 Nights is the ideal book.

We all know the proverb about teaching someone to fish, but if there are no fish left, knowing how to catch them won't do you any good. And that's the position businesses are in today. Resources are being depleted at an alarming rate and the cost of raw materials is rising dramatically. As a result, scholar and entrepreneur Nadya Zhexembayeva says, businesses need to make resource scarcity—the overfished ocean—their primary strategic consideration, not just a concern for their “green” division. *Overfished Ocean Strategy* offers five essential principles for innovating in this new reality. Zhexembayeva shows how businesses can find new opportunities in what were once considered useless by-products, discover resource-conserving efficiencies up and down their value chain, transfer their expertise from physical products to services, and develop ways to rapidly try out and refine these new business models. She fills the book with examples of companies that are already successfully navigating the overfished ocean, from established corporations such as BMW, Microsoft, and Puma to newcomers such as Lush, FLOW2, and Sourcemap. The linear, throwaway economy of today—in which we extract resources at one end, create products, and throw them away at the other—is rapidly coming to an end. In every industry, creative minds are learning how to make money by taking this line and turning it into a circle. Nadya Zhexembayeva shows how you can join them and avoid being left high and dry.

The authors explore the logical properties of diagrams, charts, and maps, and the role these play in problem solving and teaching reasoning skills.
