Each chapter has two How-To projects, focused on Digital Literacy and Essential Job Skills, so that students are gaining the skills needed for professional and personal success. Within the etext, students are engaged through interactive surveys, currency updates, videos, IT Simulations, interactives, fun study tools, and flashcards with immediate feedback. With the new Technology in the News feature, you can keep your class current every week. And with the new Think About It videos, students are encouraged to think critically about the impact of technology, beyond the convenience factors!
