The Texan II name recalls the North American T-6 Texan of World War II, a type used extensively by the RAF and Royal Canadian Air Force as the Harvard. When the T-6A-1 was developed as the CT-156 for the NATO Flying Training in Canada programme, it was appropriately named Harvard II. Subsequent variants include the T-6B for the US Navy and T-6C export version. Chosen to supply a Tucano ...

The North American T-6 Texan two-place advanced trainer was the classroom for most of the Allied pilots who flew in WW2. Designated the SNJ by the Navy and the Harvard by the RAF, the AT-6 (advanced trainer) was designed as a transition trainer between basic trainers and first-line tactical aircraft. It was redesignated T-6 in 1948.

NORTH AMERICAN T-6 TEXAN - Flight Manuals

We decided for the "Texan" because it is one of the most famous airplanes ever built. It is THE classic warbird, trainer and show plane. There are plenty of color schemes to choose from, many are still flying in races and airshows. And it is a generally well flying plane due to its large wing with huge split flaps, the short landing gear and an otherwise very straight forward aerodynamic ...

Harvard AT-6 "Texan" - CARF-Models

Designated the T-6G, the Texan saw major improvements in increased fuel capacity, an improved cockpit layout, as well as a steerable tailwheel. U.S. Air Force and U.S. Navy forces in the Korean War modified the Texan under the LT-6G designation and employed it in battlefield surveillance.

T6 Harvard in Combat - T6 Harvard Aviation T6 Harvard Aviation

A total of 14,130 Texans were built from January of 1940 to August 1945. Approximately 500 T-6s are in flight worthy condition today. North American Aviation designers and engineers Dutch Kindlerberger, Lee Atwood and H.R.Raynor designed and built the Texan prototype, the NA-16, in nine weeks. First NA16 (T-6) flew on April 1, 1935
